Cumulative Author Index for Volumes 146–154

The volume numbers are given in bold-face type preceding the page numbers.

A

Aaron, D. B., **150**, 245
Abdullayev, A. G., **146**, 265
Abhyankar, N. M., **151**, 325
Aboelfotoh, M. O., **153**, 349
Adams, E. D., **153**, 329
Adams, R. O., **154**, 101
Agarwala, R. P., **152**, L131
Ahmed, M. M., **149**, 163
Ahmed, W., **148**, L63
Ahn, K. Y., **153**, 349, 409, 469; **154**, 81
Ajustron, F., **150**, 69
Akani, M., **151**, 343
Al-Jaroudi, M. Y., **154**, 425
Al-Jassar, A. A., **148**, 191
Albano, E. V., **151**, 121
Albin, D. S., **147**, 203
Albrand, G., **146**, 145
Alexandrova, S., **150**, 303
Alnot, M., **151**, 251
Amirhagi, S., **149**, 283
Ance, C., **150**, 181
Andrade, J. D., **152**, 335
Andrew, R., **148**, 163
Antonova, K. T., **151**, 1
Apostolova, M., **147**, 33
Appelbaum, A., **149**, 303
Arai, T., **154**, 387
Araki, H., **152**, 473, 481
Argile, C., **152**, 545
Aries, L., **151**, 413
Aubert, A., **153**, 281
Awal, M. A., **154**, 249
Azzam, M.-O. J., **152**, 29
Azzam, R. M. A., **147**, 17

Cumulative Subject Index for Volumes 146–154

The volume numbers are given in bold-face type preceding the page numbers.

A

Acoustics
- picosecond acoustics as a non-destructive tool for the characterization of very thin films, **154**, 217
- study of crack initiation and propagation in Ni–Cr thermally sprayed coatings using acoustic emission techniques, **153**, 243

Activation energy
- problems encountered during the measurement of the activation energy of dark conductivity of undoped a-Si:H films, **148**, 121

Adhesion
- adhesion measurements of chemically vapour-deposited and physically vapour-deposited hard coatings on WC–Co substrates, **154**, 361
- adhesion and structure of TiN arc coatings, **153**, 135
- adhesion testing by the scratch test method: the influence of intrinsic and extrinsic parameters on the critical load, **154**, 333
- elasticity and adhesion of thin films by a mechanical resonance method, **151**, 17
- evaluation of adhesion strength of thin hard coatings, **154**, 387
- relationship between hardness and scratch adhesion, **154**, 403
- structure, internal stresses, adhesion and wear resistance of sputtered alumina coatings, **153**, 123
- tempering effects in ion-plated TiN films: texture, residual stress, adhesion and colour, **146**, 165

Adsorption
- adsorption of Li and O_2 on GaAs, **152**, 545
- Auger electron spectroscopy, X-ray photoelectron spectroscopy, work function measurement and photoemission of adsorbed Xe on thin films of Pt–Re(111) alloys, **151**, 251
- deviations from two-dimensionality in classical adsorbed films composed of linear molecules, **147**, 223
- low temperature NH_3 adsorption on clean amorphous and crystalline Si surfaces and N bonding in a-Si_3N_4:H: a comparative X-ray photoelectron spectroscopy study, **149**, 385
- orientational effects in adsorption
  - III: in-plane ordering in localized monolayers of diatomic molecules on crystalline solids, **150**, 89
- phase transition in adsorbed layers
  - VII: a model for mixed gas adsorption on solid surfaces, **147**, 333
  - VIII: evaluation of phase diagrams for monolayers of Ar, Kr and Xe adsorbed on graphite, **150**, 105

Alkali halides
- decoration of alkali halide crystals with In_2O_3 and SnO_2 by spraying technique, **146**, L23
- role of preferred surface sites in the nucleation and growth of Au on NaCl
  - II: reanalysis of two comprehensive studies, **149**, 363
- universal model for the nucleation of Au on NaCl, **149**, 113

Alloying
- fundamental and practical aspects of alloying encapsulated Au-based contacts to GaAs, **149**, 251

Alloys
- acid corrosion behaviour of amorphous and crystalline $Ti_{75}Ni_{20}Si_5$ alloys, **149**, 171
- electrical resistivity and lattice parameters of sputtered Ir alloys, **149**, 17
- optical and electrochemical investigation of oxide films on electrodeposited Sn–Ni alloy coatings: determination of composition and mechanism of growth of oxide films, **150**, 115

© Elsevier Sequoia/Printed in The Netherlands

stopping power measurements for megaelectronvolt $^4He^+$ ions via thin films of metals and binary metal alloys, **149**, 219
ternary alloy films of Ni–Cr–Al for thin film resistors, **146**, 133
Alumina
formation of relatively pure alumina films by anodic polarization, **148**, 333
Aluminium
aluminized polyester films: influence of substrate on metal texture, **149**, 105
Auger electron spectroscopy and capacitance–voltage investigation of the AlN–Si interface, **146**, 265
characterization of thin Al_2O_3 films on InP substrates by X-ray topography, **148**, L67
concentration of free metallic particles in thin Al_2O_3 films, **150**, L101
effect of the nature of the counterelectrode on the current–voltage characteristics of thin film $Al/Al_2O_3/Te$ structures, **148**, 261
effects of substrate temperature on Cu distribution, resistivity and microstructure in magnetron-sputtered Al–Cu films, **153**, 409
electrical properties of multilayered Al/Ni and Al/Mo films, **146**, 155
electrical properties of thin V–Al alloy films, **151**, 297
electromechanical properties and characterization of zirconia–alumina and alumina coatings, **154**, 143
electron microscope observations and measurements in the Al/Ag thin film system, **146**, 83
electron spectroscopy study of the growth and thermally activated diffusion of Ni thin films on Al(111) and Al_2O_3/Al(111), **153**, 341
formation of titanium, chromium, niobium and zirconium aluminides in thin films for interconnections, **149**, 269
high resolution electron microscopy and nanodiffraction study of the MgO–Al interface, **148**, 301
intrinsic stress in AlN prepared by dual-ion-beam sputtering, **154**, 159
kinetics of the formation of nickel aluminide coatings on pure Ni by chemical vapour deposition, **146**, 55
mechanical properties and microstructures of Al–1%Si thin film metallizations, **150**, 237
metastable phases in vapour-deposited Al–Zr thin films, **146**, 273
microstructure and physical properties of polycrystalline metastable $Ti_{0.5}Al_{0.5}N$ alloys grown by d.c. magnetron sputter deposition, **153**, 55
planarization of Al alloy film during high rate sputtering, **153**, 369
plasma-enhanced chemical vapour deposition of AlN coatings on graphite substrates, **146**, 255
properties of physically vapour-deposited Ti–Al–V–N coatings, **153**, 83
relationship between substrate bias and microstructure in magnetron-sputtered Al–Cu films, **154**, 81
stress rupture and creep behaviour of a low pressure plasma-sprayed NiCoCrAlY coating alloy in air and vacuum, **147**, 143
structure, internal stresses, adhesion and wear resistance of sputtered alumina coatings, **153**, 123
study of the initial aluminide phase growth in Al/Pt couples, **153**, 379
surface and interface characterization of heat-treated (Ti, Al)N coatings on high speed steel substrates, **153**, 45
ternary alloy films of Ni–Cr–Al for thin film resistors, **146**, 133
thermally induced phenomena in $Ga_{1-x}Al_xAs$ optical filters, **146**, L41
thin polycrystalline Si films grown by quasi-rheotaxy on Al-covered glass substrates, **147**, 251
$Ti_xAl_{1-x}N$ films deposited by ion plating with an arc evaporator, **153**, 67
Ammonia
low temperature NH_3 adsorption on clean amorphous and crystalline Si surfaces and N bonding in a-Si_3N_4:H: a comparative X-ray photoelectron spectroscopy study, **149**, 385
plasma-enhanced chemical vapour deposition of silicon nitride from 1,1,3,3,5,5-hexamethylcyclotrisilazane and NH_3, **153**, 521
Amorphous films
amorphous-to-crystalline transition of indium oxide films deposited by reactive evaporation, **151**, 215
crystallization behaviour of amorphous SiC films prepared by r.f. sputtering, **151**, 403
electric field dependence of conductivity in thin amorphous films and bulk glasses in the system $Ge_4Se_{6-x}Te_x$, **150**, 135
measurement of saturation magnetostriction of a thin amorphous film by means of small angle magnetization oscillation, **148**, 1
Amphiphiles
oriented ultrathin membranes from monomeric and polymeric amphiphiles: monolayers, liposomes and multilayers, **152**, 207
Annealing
annealing behaviour and magnetic properties of

Co/Pt and Fe/Pt bilayer thin films, **146**, 21
characterization of titanium silicide films formed by composite sputtering and rapid thermal annealing, **151**, 51
encapsulation and annealing studies of semi-insulating InP, **146**, 221
rapid thermal anneal of As implanted into Si(100) and Si(111), **149**, 189
statistical study of the combined effects of substrate temperature, bias, annealing and a Cr_3Si_2 undercoating on the tribological properties of r.f.-sputtered MoS_2 coatings, **154**, 323
thermal annealing and hydrogenation of a-Si:H:Cl films, **147**, 285
Antimony
analysis of the dose dependence of the thermoelectric power of ion-bombarded Bi/Sb thin films, **152**, 449
characterization of interface electrical properties in SiO_2/InSb metal/insulator/semiconductor structures prepared by plasma-enhanced chemical vapour deposition, **148**, 243
electrical properties of InSb metal/insulator/semiconductor diodes prepared by photochemical vapour deposition, **151**, 145
study of O_2 interaction with GaSb cleaved surfaces by work function and photovoltage measurements, **151**, 103
Applications
future applications of ordered polymeric thin films, **152**, 377
Arcs
adhesion and structure of TiN arc coatings, **153**, 135
cathodic arc plasma deposition of TiC and TiC_xN_{1-x} films, **153**, 209
characteristics of Ti arc evaporation processes, **153**, 91
reactive arc vapour ion deposition of TiN, ZrN and HfN, **153**, 75
$Ti_xAl_{1-x}N$ films deposited by ion plating with an arc evaporator, **153**, 75
Argon
measurement of the distribution of Ar in sputter-deposited very-large-scale integration metallization, **153**, 401
phase transition in adsorbed layers
VIII: evaluation of phase diagrams for monolayers of Ar, Kr and Xe adsorbed on graphite, **150**, 105
thermal nitridation of Ar-implanted Si, **148**, 75
Arsenic
a.c. properties of polycrystalline GaAs and $(GaAs)_{1-x}(SiC_2{:}H)_x$ grown by metal–organic chemical vapour deposition, **146**, 241
adsorption of Li and O_2 on GaAs, **152**, 545
angle-dependent X-ray photoelectron spectroscopy investigation of GaAs surfaces, **154**, 301
CdAs films prepared by pulsed laser evaporation: electrical properties and lattice parameters, **147**, L51
characterization of alloyed Au/Cr/Au/Ge ohmic contacts on GaAs by electrical measurements, transmission electron microscopy and Auger electron spectroscopy, **147**, 117
determination of the refractive index profile of As-implanted GaP by ellipsometry, **148**, 135
diffusion of Ga in thin Au films on GaAs, **151**, L121
effect of r.f. sputtering parameters on ZnO films deposited onto GaAs substrates, **150**, 283
fundamental and practical aspects of alloying encapsulated Au-based contacts to GaAs, **149**, 251
growth and optical characterization of spin-coated As_2S_3 multilayer thin films, **147**, 275
in situ X-ray diffraction study of the effects of Ge and Ni concentrations on melting in Au-based contacts to GaAs, **147**, 177
molecular beam epitaxy of InAs/$Sr_{1-x}Ba_xF_2$/InAs structures, **149**, 205
physicochemical analysis of InAs gas phase epitaxy in the InAs–$AsCl_3$–H_2 system
I: thermodynamic considerations, **147**, 33
II: InAs transport and epitaxial growth kinetics, **147**, 41
radiation damage effects in GaAs transmission electron microscopy specimens prepared by ion milling, **149**, 73
rapid thermal anneal of As implanted into Si(100) and Si(111), **149**, 189
structure of GaAs–$In_{0.2}Ga_{0.8}As$ heterojunction interface studied by electron spectroscopies: X-ray photoelectron spectroscopy, tunable electron energy loss spectroscopy and Auger electron spectroscopy, **146**, 291
thermally induced phenomena in $Ga_{1-x}Al_xAs$ optical filters, **146**, L41
transport properties of thin amorphous films of cadmium arsenide, **151**, 87
Auger electron spectroscopy
Auger electron spectroscopic investigations of the influence of deposition parameters on the stoichiometry of n-CdSe films electrodeposited from low purity materials, **150**, 51
Auger electron spectroscopy and Rutherford backscattering spectroscopy studies of TiN and TiC coatings prepared by the activated

reactive evaporation process, **153**, 149
Auger electron spectroscopy and capacitance–voltage investigation of the AlN–Si interface, **146**, 265
Auger electron spectroscopy, X-ray photoelectron spectroscopy, work function measurement and photoemission of adsorbed Xe on thin films of Pt–Re(111) alloys, **151**, 251

B

Ball-bearings
properties and performance of chemically vapour-deposited TiC-coated ball-bearing components, **153**, 253
Barriers
effects of processing parameters on the microstructure and properties of sputter-deposited TiW thin film diffusion barriers, **153**, 313
growth and properties of TiN and TiO_xN_y diffusion barriers in Si-on-sapphire integrated circuits, **153**, 287
stoichiometry in Ti–N barrier layers studied by X-ray emission spectroscopy, **153**, 303
Bias
relationship between substrate bias and microstructure in magnetron-sputtered Al–Cu films, **154**, 81
statistical study of the combined effects of substrate temperature, bias, annealing and a Cr_3Si_2 undercoating on the tribological properties of r.f.-sputtered MoS_2 coatings, **154**, 323
Bilayers
annealing behaviour and magnetic properties of Co/Pt and Fe/Pt bilayer thin films, **146**, 21
study of the Kirkendall effect in magnetic bilayers by spin wave resonance method, **146**, L37
Birefringence effects
birefringence effects in metal overlayers on Langmuir–Blodgett films, **150**, 83
Bismuth
analysis of the dose dependence of the thermoelectric power of ion-bombarded Bi/Sb thin films, **152**, 449
X-ray diffraction studies of Bi_2O_3 films prepared by reactive and activated reactive evaporation, **148**, 181
Bond strain
effects of bond strain on the properties of plasma-deposited silicon oxide films, **150**, L97
Boron
compressive stress of thin cubic BN films prepared by r.f. reactive sputtering on r.f.-biased substrates, **149**, L77
diffusion measurements in the metallic glass $Fe_{80}B_{20}$, **152**, 511
laser pulse vapour deposition of polycrystalline wurtzite-type BN, **147**, L45
Lorentz microscopy studies of magnetic ripple in amorphous Fe–B–Si films, **147**, 1
microhardness measurement on B coatings, **152**, L131
microstructure of B-doped Si layers prepared by low pressure chemical vapour deposition, **150**, 69
preparation and characterization of titanium boride films, **153**, 329
preparation and properties of cubic boron nitride coatings, **153**, 487
preparation of cubic boron nitride films by reactive diode sputtering, **151**, 243
wear resistance of metastable Ni–B alloys produced by chemical vapour deposition, **153**, 267
Brillouin spectroscopy
Brillouin spectroscopy of multilayer films, **154**, 225
Bronze
optical properties of tungsten bronze surfaces, **148**, L59

C

Cadmium
anomalous photovoltaic effect in vacuum-deposited CdTe films, **150**, 217
Auger electron spectroscopic investigations of the influence of deposition parameters on the stoichiometry of n-CdSe films electrodeposited from low purity materials, **150**, 51
cadmium chloride thin films: hydration–dehydration, **150**, L93
CdAs films prepared by pulsed laser evaporation: electrical properties and lattice parameters, **147**, L51
formation and properties of vacuum-evaporated high conductivity n-type CdTe films, **147**, 75
grain boundary interdiffusion in Cd/Te thin film couples, **148**, 163
growth of epitaxial $Cd_{1-x}Mn_xTe$ films by hot-wall evaporation, **150**, 337
kinetics of the dry formation of Cu_2S in Cu_2S/CdS solar cells, **151**, 133
mechanism for CdSe deposition by fused salt electrolysis, **147**, 65
mechanisms of temperature quenching of luminescence due to deep centres in $CdSe_xTe_{1-x}$ $(0 < x < 1)$ alloys, **146**, 233
nucleation and growth characteristics of spray-

pyrolysed CdS thin films, **147**, 203
optical transitions in CdTe thin films produced by hot-wall vacuum evaporation, **147**, 9
optically monitored electrodeposition of thin CdSe films, **147**, 291
preparation, electrical properties and optical characterization of Cd_2SnO_4 and $CdIn_2O_4$ thin films as transparent and conductive coatings, **153**, 479
structure and composition of Te/CdS thin film diodes, **149**, 325
transport properties of thin amorphous films of cadmium arsenide, **151**, 87
trap diagnostic of thin CdS films, **146**, 139
Carbon
a.c. properties of polycrystalline GaAs and $(GaAs)_{1-x}(SiC_2{:}H)_x$ grown by metal–organic chemical vapour deposition, **146**, 241
adhesion measurements of chemically vapour-deposited and physically vapour-deposited hard coatings on WC–Co substrates, **154**, 361
Auger electron spectroscopy and Rutherford backscattering spectroscopy studies of TiN and TiC coatings prepared by the activated reactive evaporation process, **153**, 149
breakdown conduction in C thin film devices with Ag film contacts on glass substrates, **152**, 473
cathodic arc plasma deposition of TiC and TiC_xN_{1-x} films, **153**, 209
cross-sectional transmission electron microscopy characterization of the interface between plasma-sprayed TiC and Inconel, **154**, 91
crystallization behaviour of amorphous SiC films prepared by r.f. sputtering, **151**, 403
effect of dilution gases in methane on the deposition of diamond-like C in a microwave discharge: effect of hydrogen, **146**, 283
effect of substrate steel on the chemical vapour deposition of TiC onto tool steels, **149**, 95
electroforming of a C thin film device with an Ag film, **152**, 481
from diamond-like C to diamond coatings, **153**, 1
intrinsic stress in diamond-like C films and its dependence on deposition parameters, **146**, 27
morphology and structure of chemically vapour-deposited Ti(C, N) coatings, **146**, 45
properties and performance of chemically vapour-deposited TiC-coated ball-bearing components, **153**, 253
properties of a-C films deposited by ion-beam methods, **148**, 311
r.f.-sputtered SiC coatings on C fibres, **148**, 93
reactive and non-reactive high rate sputter deposition of tungsten carbide, **151**, 383
semiconductor properties of amorphous C–Sn thin films, **146**, L19
spalling resistance of cemented carbide with physically and chemically vapour-deposited coatings, **154**, 417
structure and optical properties of hydrogenated a-C–Sn alloys prepared using the sputter-assisted plasma chemical deposition technique, **150**, 189
structure and physical properties of plasma-grown a-C:H films, **146**, 93
surface topography of pyrolytic C and of Au thin films by scanning tunnelling microscopy: grain boundaries and surface defects, **154**, 65
three-dimensional secondary ion mass spectrometry analysis of surface-modified materials and the application to ^{13}C-implanted steels, **153**, 197
transparent C film electrodes for IR investigations of PVDF, **152**, L135
X-ray section topographs of a vapour-grown diamond film on a diamond substrate, **151**, 199
Young's modulus of TiN, TiC, ZrN and HfN, **153**, 37
Carrier gas
role of carrier gas in the deposition kinetics of SiO_2 films produced by low temperature chemical vapour deposition, **146**, 183
Chalcopyrites
theoretical analysis of the Einstein relation in ultrathin films of degenerate ternary chalcopyrite semiconductors, **148**, 219
Chemical analysis
chemical analysis of TiN films: a round robin experiment, **153**, 169
Chemical conversion
comment on "Spectrally selective surfaces on stainless steel produced by chemical conversion", **151**, L125
spectrally selective surfaces on stainless steel produced by chemical conversion, **147**, 243
Chemical deposition
chemical deposition of ZnO film, **149**, 65
Chemical vapour deposition
chemical vapour deposition of doped TiO_2 thin films, **147**, 167
chemical vapour deposition of superconducting Nb_3Ge controlled by diffusion in the gas phase, **150**, 311
effect of substrate steel on the chemical vapour deposition of TiC onto tool steels, **149**, 95

kinetics of the formation of nickel aluminide coatings on pure Ni by chemical vapour deposition, **146**, 55
plasma-enhanced chemical vapour deposition of AlN coatings on graphite substrates, **146**, 255
plasma-enhanced chemical vapour deposition of Mo, **147**, 193
role of carrier gas in the deposition kinetics of SiO_2 films produced by low temperature chemical vapour deposition, **146**, 183
Chlorine
effect of Cl on electrophotographic properties of Se–Te alloy, **149**, 9
studies on $PbCl_2$ thin film galvanic cells, **151**, 325
thermal annealing and hydrogenation of a-Si:H:Cl films, **147**, 285
Chromium
characterization of Ni–Cr thin films by X-ray analysis, **148**, 209
characterization of alloyed Au/Cr/Au/Ge ohmic contacts on GaAs by electrical measurements, transmission electron microscopy and Auger electron spectroscopy, **147**, 117
formation of titanium, chromium, niobium and zirconium aluminides in thin films for interconnections, **149**, 269
magnetic properties and microstructure of sputtered Co–Cr films, **147**, 231
magnetic properties of d.c.-magnetron-sputtered CoCr thin films, **154**, 431
orientation and morphology of Cr deposits on hot Cu{111} substrates, **146**, 299
statistical study of the combined effects of substrate temperature, bias, annealing and a Cr_3Si_2 undercoating on the tribological properties of r.f.-sputtered MoS_2 coatings, **154**, 323
stress rupture and creep behaviour of a low pressure plasma-sprayed NiCoCrAlY coating alloy in air and vacuum, **147**, 143
study of crack initiation and propagation in Ni–Cr thermally sprayed coatings using acoustic emission techniques, **153**, 243
ternary alloy films of Ni–Cr–Al for thin film resistors, **146**, 133
Cobalt
adhesion measurements of chemically vapour-deposited and physically vapour-deposited hard coatings on WC–Co substrates, **154**, 361
analysis of Co-doped iron oxide thin films by synchrotron radiation, **154**, 439
annealing behaviour and magnetic properties of Co/Pt and Fe/Pt bilayer thin films, **146**, 21
formation and magnetic properties of artificial superlattice of $CoO–Fe_3O_4$, **152**, 455
magnetic properties and microstructure of sputtered Co–Cr films, **147**, 231
magnetic properties of d.c.-magnetron-sputtered CoCr thin films, **154**, 431
solution growth technique for the deposition of cobalt selenide thin film, **149**, L81
stress rupture and creep behaviour of a low pressure plasma-sprayed NiCoCrAlY coating alloy in air and vacuum, **147**, 143
Colour
tempering effects in ion-plated TiN films: texture, residual stress, adhesion and colour, **146**, 165
Composite targets
sputtering of Mo–Si layers from composite targets, **149**, 211
Composition
advanced layer material constitution, **153**, 11
structure and composition of Te/CdS thin film diodes, **149**, 325
Contacts
breakdown conduction in C thin film devices with Ag film contacts on glass substrates, **152**, 473
characterization of alloyed Au/Cr/Au/Ge ohmic contacts on GaAs by electrical measurements, transmission electron microscopy and Auger electron spectroscopy, **147**, 117
fundamental and practical aspects of alloying encapsulated Au-based contacts to GaAs, **149**, 251
in situ X-ray diffraction study of the effects of Ge and Ni concentrations on melting in Au-based contacts to GaAs, **147**, 177
investigation of ring structures for metal–semiconductor contact resistance determination, **146**, 15
Copper
$Cu_xLi_{1-x}InTe_2$ epitaxial layers on $A^{III}B^{V}$ substrates and the influence of lattice misfit, **151**, 35
effects of substrate temperature on Cu distribution, resistivity, and microstructure in magnetron-sputtered Al–Cu films, **153**, 409
electrodeposition and characterization of Cu_2O, **148**, 191
formation of whiskers and hillocks on the surface of thin films of Cu/Sn, **150**, 357
Fourier transform IR reflection techniques for characterization of polyimide films on Cu substrates, **154**, 271

kinetics of the dry formation of Cu_2S in Cu_2S/CdS solar cells, **151**, 133
kinetics of the formation of intermetallic compounds in thin films of Cu/Sn, **148**, 111
orientation and morphology of Cr deposits on hot Cu{111} substrates, **146**, 299
preparation of highly ordered ultrathin films of copper(II) phthalocyanine on amorphous substrate by molecular beam deposition, **151**, L109
properties of chemically deposited $Cu_{2-x}Se$ thin films, **150**, L89
relationship between substrate bias and microstructure in magnetron-sputtered Al–Cu films, **154**, 81
topography and microstructure of Cu–Sn coatings deposited by magnetron sputtering, **151**, 235
voltaic cells of $(Zn_xCu_y)O_z$ thin films deposited by r.f. sputtering, **152**, 443
Corrosion
acid corrosion behaviour of amorphous and crystalline $Ti_{75}Ni_{20}Si_5$ alloys, **149**, 171
Couples
study of the initial aluminide phase growth in Al/Pt couples, **153**, 379
Cracks
study of crack initiation and propagation in Ni–Cr thermally sprayed coatings using acoustic emission techniques, **153**, 243
Creep
stress rupture and creep behaviour of a low pressure plasma-sprayed NiCoCrAlY coating alloy in air and vacuum, **147**, 143
Crystallization
crystallization behaviour of amorphous SiC films prepared by r.f. sputtering, **151**, 403
influence of the substrate on the crystallization kinetics of vapour-deposited a-Se films, **149**, L73

D

Decoration
decoration of alkali halide crystals with In_2O_3 and SnO_2 by spraying technique, **146**, L23
Defects
defect characterization and detection in films, **152**, 155
interface defects introduced in Si/SiO_2 structures by implantation, **150**, 303
surface topography of pyrolytic C and of Au thin films by scanning tunnelling microscopy: grain boundaries and surface defects, **154**, 65
Density
influence of preparation parameters on the deposition rate, density and optical properties of thin a-Si:H films prepared by r.f. glow discharge, **149**, 331
Deposition parameters
Auger electron spectroscopic investigations of the influence of deposition parameters on the stoichiometry of n-CdSe films electrodeposited from low purity materials, **150**, 51
intrinsic stress in diamond-like C films and its dependence on deposition parameters, **146**, 27
Deposition rate
effect of the deposition rate on the properties of d.c. magnetron-sputtered niobium nitride thin films, **152**, 535
influence of preparation parameters on the deposition rate, density and optical properties of thin a-Si:H films prepared by r.f. glow discharge, **149**, 331
Deposition temperature
control of the deposition temperature by the use of a magnetic field in r.f. sputtering, **151**, 397
influence of the TiN deposition temperature on the critical load and hardness of hardened steels, **154**, 425
Depth profiling
depth profiles of the optical properties of buried oxides (SIMOX) by ellipsometry, **148**, 127
influence of the individual layer thickness on the depth resolution determined sputter depth profiling of multilayers, **146**, L11
Diamond-like films
effect of dilution gases in methane on the deposition of diamond-like C in a microwave discharge
II: effect of H_2, **146**, 283
from diamond-like C to diamond coatings, **153**, 1
intrinsic stress in diamond-like C films and its dependence on deposition parameters, **146**, 27
X-ray section topographs of a vapour-grown diamond film on a diamond substrate, **151**, 199
Die bond materials
die bond materials and bonding mechanisms in microelectronic packaging, **153**, 431
Dielectric properties
structure-dependent dielectric response of *p*-terphenyl thin films, **151**, 289
Diffusion
chemical vapour deposition of superconducting Nb_3Ge controlled by diffusion in the gas phase, **150**, 311
diffusion measurements in the metallic glass $Fe_{80}B_{20}$, **152**, 511

diffusion model for an inhomogeneous medium, **149**, 177
effects of processing parameters on the microstructure and properties of sputter-deposited TiW thin film diffusion barriers, **153**, 313
electron spectroscopy study of the growth and thermally activated diffusion of Ni thin films on Al(111) and Al_2O_3/Al(111), **153**, 341
grain boundary interdiffusion in Cd/Te thin film couples, **148**, 163
growth and properties of TiN and TiO_xN_y diffusion barriers in Si-on-sapphire integrated circuits, **153**, 287
Diffusion barriers
investigation of amorphous $Ni_{0.60}Nb_{0.40}$ diffusion barriers, **150**, 245
Diodes
current–voltage spectra of metal/oxide/SnTe diodes
II: analysis, **149**, 149
structure and composition of Te/CdS thin film diodes, **149**, 325
Discontinuous films
temperature dependence of electrical conduction in discontinuous Ag films on sapphire substrates, **148**, 233
Dissolution
low temperature O_2 dissolution in Ti, **146**, 201

E

Einstein relation
theoretical analysis of the Einstein relation in ultrathin films of degenerate ternary chalcopyrite semiconductors, **148**, 219
Electric currents
influence of the spatially non-homogeneous trap distribution on the transient currents in insulating layers at high fields, **149**, 261
Electric fields
comments on Bak's model of the field-dependent mobility in organic layers
II: reply to the author's latest remarks, **146**, L7
effect of electrodes and high fields on the electrical conductivity of evaporated Ge and Te thin films, **146**, L27
electric field dependence of conductivity in thin amorphous films and bulk glasses in the system $Ge_4Se_{6-x}Te_x$, **150**, 135
influence of the spatially non-homogeneous trap distribution on the transient currents in insulating layers at high fields, **149**, 261
remarks about "Comments on Bak's model ..." by Mycielski, **146**, L1
Electrical breakdown
breakdown conduction in C thin film devices with Ag film contacts on glass substrates, **152**, 473
Electrical conductance
effect of a finite r.f. conductance of native oxide on InP metal/insulator/semiconductor admittance, **150**, 227
Electrical conduction
a.c. conduction in SiO_x films of variable composition, **151**, L105
new model for electron movement in a thick film resistor and its application to analysis of the structure and conduction mechanism in these resistors, **152**, 487
temperature dependence of electrical conduction in discontinuous Ag films on sapphire substrates, **148**, 233
Electrical conductivity
effect of electrodes and high fields on the electrical conductivity of evaporated Ge and Te thin films, **146**, L27
electric field dependence of conductivity in thin amorphous films and bulk glasses in the system $Ge_4Se_{6-x}Te_x$, **150**, 135
influence of preparation technique on the conductivity of thin amorphous $Ge_4Se_{6-x}Te_x$ films, **150**, 125
problems encountered during the measurement of the activation energy of dark conductivity of undoped a-Si:H films, **148**, 121
Electrical properties
a.c. properties of polycrystalline GaAs and $(GaAs)_{1-x}(SiC_2{:}H)_x$ grown by metal–organic chemical vapour deposition, **146**, 241
Auger electron spectroscopy and capacitance–voltage investigation of the AlN–Si interface, **146**, 265
CdAs films prepared by pulsed laser evaporation: electrical properties and lattice parameters, **147**, L51
characterization of interface electrical properties in SiO_2/InSb metal/insulator/semiconductor structures prepared by plasma-enhanced chemical vapour deposition, **148**, 243
comments on Bak's model of the field-dependent mobility in organic layers
II: reply to the author's latest remarks, **146**, L7
current–voltage spectra of metal/oxide/SnTe diodes
II: analysis, **149**, 149
effect of the nature of the counterelectrode on the current–voltage characteristics of thin

film $Al/Al_2O_3/Te$ structures, **148**, 261
electrical and optical properties of phthalocyanine films, **149**, 129
electrical properties of multilayered Al/Ni and Al/Mo films, **146**, 155
electrical properties of thin V–Al alloy films, **151**, 297
electrical properties of InSb metal/insulator/semiconductor diodes prepared by photochemical vapour deposition, **151**, 145
formation of Si(phthalocyaninato)$(OH)_2$ and $[Si(phthalocyaninato)O]_n$ films and their optical and electrical properties, **151**, L115
influence of I on electrical properties of lead phthalocyanine, **146**, 1
influence of film thickness on optical and electrical properties of a-Si:H, **150**, 1
new evidence for the validity of the Fuchs–Sondheimer theory, **152**, 499
preparation and electrical properties of plasma-polymerized copper acetylacetonate thin films, **151**, 71
preparation, electrical properties and optical characterization of Cd_2SnO_4 and $CdIn_2O_4$ thin films as transparent and conductive coatings, **153**, 479
remarks about "Comments on Bak's model ..." by Mycielski, **146**, L1

Electrical resistivity
effects of substrate bias on the resistivity and microstructure of Mo and molybdenum silicide films, **153**, 359
effects of substrate temperature on Cu distribution, resistivity, and microstructure in magnetron-sputtered Al–Cu films, **153**, 409
electrical resistivity and lattice parameters of sputtered Ir alloys, **149**, 17
investigation of ring structures for metal–semiconductor contact resistance determination, **146**, 15
plasma conditions for the deposition of TiN by biased activated reactive evaporation and dependence of the resistivity on preferred orientation, **153**, 115
resistivity and photoconductivity of plasma-sprayed polycrystalline Si, **151**, 343
resistivity, temperature coefficient of resistivity and thermoelectric power of thin continuous metal films
II: a methodology for computer processing of thin film data to extract parameters with associated error estimates, **150**, 163
temperature-dependent resistivity measurements on polycrystalline SiO_2-covered thin Ni films, **150**, 209
temperature-dependent resistivity measurements on polycrystalline SiO_2-covered thin Au films, **150**, 201

Electrochemistry
electrochemical adjustment of thin film Ti–Pd resistors, **153**, 387

Electrodeposition
Auger electron spectroscopic investigations of the influence of deposition parameters on the stoichiometry of n-CdSe films electrodeposited from low purity materials, **150**, 51
electrodeposition and characterization of Cu_2O, **148**, 191
mechanism for CdSe deposition by fused salt electrolysis, **147**, 65
optical and electrochemical investigation of oxide films on electrodeposited Sn–Ni alloy coatings
I: determination of composition and mechanism of growth of oxide films, **150**, 115
optically monitored electrodeposition of thin CdSe films, **147**, 291

Electrodes
effect of electrodes and high fields on the electrical conductivity of evaporated Ge and Te thin films, **146**, L27
effect of the nature of the counterelectrode on the current–voltage characteristics of thin film $Al/Al_2O_3/Te$ structures, **148**, 261
transparent C film electrodes for IR investigations of PVDF, **152**, L135

Electrolysis
mechanism for CdSe deposition by fused salt electrolysis, **147**, 65

Electromechanical properties
electromechanical properties and characterization of zirconia–alumina and alumina coatings, **154**, 143

Electron beam evaporation
films of rare earth oxides formed by electron beam evaporation, **154**, 101
properties of electron-beam-evaporated tin oxide films, **147**, 321
properties of tin oxide films prepared by reactive electron beam evaporation, **149**, 291

Electron diffraction
high resolution electron microscopy and nano-diffraction study of the MgO–Al interface, **148**, 301

Electron microscopy
electron microscope observations and measurements in the Al/Ag thin film system, **146**, 83
high resolution electron microscopy and nano-diffraction study of the MgO–Al interface, **148**, 301

Electron spectroscopy
electron spectroscopy study of the growth and thermally activated diffusion of Ni thin films on Al(111) and Al_2O_3/Al(111), **153**, 341
Electronic structure
fundamental aspects of the electronic structure, materials properties and lubrication performance of sputtered MoS_2 films, **154**, 309
Electrons
new model for electron movement in a thick film resistor and its application to analysis of the structure and conduction mechanism in these resistors, **152**, 487
role of preferred surface sites in the nucleation and growth of Au on NaCl
I: the influence of low energy electrons, **149**, 351
Electrophotographic properties
effect of Cl on electrophotographic properties of Se–Te alloy, **149**, 9
Ellipsometry
depth profiles of the optical properties of buried oxides (SIMOX) by ellipsometry, **148**, 127
determination of the refractive index profile of As-implanted GaP by ellipsometry, **148**, 135
investigation of d.c. planar-magnetron-sputtered Pd films by spectroscopic ellipsometry, **154**, 281
Encapsulation
characterization of plasma-deposited silicon nitride coating used for integrated circuit encapsulation, **153**, 459
encapsulation and annealing studies of semi-insulating InP, **146**, 221
Epitaxy
characterization of epitaxial films by grazing-incidence X-ray diffraction, **154**, 33
crystal structure of the epitaxially grown SnO_2 thin films, **147**, 313
$Cu_xLi_{1-x}InTe_2$ epitaxial layers on $A^{III}B^{V}$ substrates and the influence of lattice misfit, **151**, 35
growth of epitaxial $Cd_{1-x}Mn_xTe$ films by hot-wall evaporation, **150**, 337
morphological transformations of thin hetero-epitaxial films, **151**, 275
onset of grapnoepitaxy at a monatomic step, **146**, 175
physicochemical analysis of InAs gas phase epitaxy in the InAs–$AsCl_3$–H_2 system
I: thermodynamic considerations, **147**, 33
II: InAs transport and epitaxial growth kinetics, **147**, 41
rhombohedral distortion of EuS epitaxial films on Si(111) substrates, **151**, 191
ZnS molecular beam epitaxy on Si substrates, **151**, 207
Erbium
thin film transistors with Er_2O_3 gate insulators, **148**, 203
Erosion
characteristic erosion of SiO_2 by oblique Ar ion beam bombardment, **147**, 153
Etching
etching and deposition phenomena in an r.f. CH_4 plasma, **147**, 83
Evaporated material
transport of evaporated material through support gas in conjunction with ion plating II, **149**, 237
Evaporation
activated reactive evaporation of a transparent conductive coating for the IR region, **148**, 83
columnar structure and texture of Fe prepared at various evaporation rates, **147**, 299
evaporation-boat-induced UV losses in MgF_2 thin films, **152**, L139
high rate evaporation from graphite crucibles, **148**, 293
indium selenide film formation by the double-source evaporation of In and Se, **146**, 65
X-ray diffraction studies of Bi_2O_3 films prepared by reactive and activated reactive evaporation, **148**, 181

F

Factor analysis
factor analysis in surface spectroscopies, **154**, 11
Failure
failure mode analysis of coated tools, **153**, 219
Fibres
r.f.-sputtered SiC coatings on C fibres, **148**, 93
Film thickness
influence of film thickness on optical and electrical properties of a-Si:H, **150**, 1
influence of substrate temperature and film thickness on the structure of reactively evaporated In_2O_3 films, **151**, 355
instrument-invariant method of film thickness determination by means of substrate-to-film X-ray peak intensity ratioing, **148**, 67
metal–insulator phase transition in VO_2: influence of film thickness and substrate, **150**, 11
Filters
thin transparent In_2O_3:Sn films as IR filters, **148**, L55
Fluorine
evaporation-boat-induced UV losses in MgF_2 thin films, **152**, L139

molecular beam epitaxy of InAs/$Sr_{1-x}Ba_xF_2$/InAs structures, **149**, 205

G

Gallium
a.c. properties of polycrystalline GaAs and $(GaAs)_{1-x}(SiC_2{:}H)_x$ grown by metal–organic chemical vapour deposition, **146**, 241
adsorption of Li and O_2 on GaAs, **152**, 545
angle-dependent X-ray photoelectron spectroscopy investigation of GaAs surfaces, **154**, 301
characterization of alloyed Au/Cr/Au/Ge ohmic contacts on GaAs by electrical measurements, transmission electron microscopy and Auger electron spectroscopy, **147**, 117
determination of the refractive index profile of As-implanted GaP by ellipsometry, **148**, 135
diffusion of Ga in thin Au films on GaAs, **151**, L121
effect of r.f. sputtering parameters on ZnO films deposited onto GaAs substrates, **150**, 283
fundamental and practical aspects of alloying encapsulated Au-based contacts to GaAs, **149**, 251
in situ X-ray diffraction study of the effects of Ge and Ni concentrations on melting in Au-based contacts to GaAs, **147**, 177
optical properties of $AgGaSe_2$ thin films, **148**, 143
radiation damage effects in GaAs transmission electron microscopy specimens prepared by ion milling, **149**, 73
structure of GaAs–$In_{0.2}Ga_{0.8}As$ heterojunction interface studied by electron spectroscopies: X-ray photoelectron spectroscopy, tunable electron energy loss spectroscopy and Auger electron spectroscopy, **146**, 291
study of O_2 interaction with GaSb cleaved surfaces by work function and photovoltage measurements, **151**, 8
thermally induced phenomena in $Ga_{1-x}Al_xAs$ optical filters, **146**, L41
Gap states
study of the gap states in vacuum-deposited Zn_3P_2 Schottky barriers using admittance spectroscopy, **149**, 1
Gates
comparative study of thin film transistors using rare earth oxides as gates, **147**, 25
Germanium
characterization of alloyed Au/Cr/Au/Ge ohmic contacts on GaAs by electrical measurements, transmission electron microscopy and Auger electron spectroscopy, **147**, 117
chemical vapour deposition of superconducting Nb_3Ge controlled by diffusion in the gas phase, **150**, 311
effect of electrodes and high fields on the electrical conductivity of evaporated Ge and Te thin films, **146**, L27
electric field dependence of conductivity in thin amorphous films and bulk glasses in the system $Ge_4Se_{6-x}Te_x$, **150**, 135
in situ X-ray diffraction study of the effects of Ge and Ni concentrations on melting in Au-based contacts to GaAs, **147**, 177
influence of preparation technique on the conductivity of thin amorphous $Ge_4Se_{6-x}Te_x$ films, **150**, 125
Raman microprobe study of Si- and Ge-on-insulator structures, **154**, 249
transient photoconductivity in amorphous thin films of $Ge_{22}Se_{78}$, **151**, 307
Glass
electric field dependence of conductivity in thin amorphous films and bulk glasses in the system $Ge_4Se_{6-x}Te_x$, **150**, 135
ion mixing of the interfaces between TiNi films and glass substrates, **147**, 93
properties of r.f. planar magnetron-sputtered Corning 7059 glass films, **146**, 191
thin polycrystalline Si films grown by quasi-rheotaxy on Al-covered glass substrates, **147**, 251
Glow discharges
production of silicon oxides from the glow discharge decomposition of a silane and NO_2, **147**, 259
Gold
characterization of alloyed Au/Cr/Au/Ge ohmic contacts on GaAs by electrical measurements, transmission electron microscopy and Auger electron spectroscopy, **147**, 117
diffusion of Ga in thin Au films on GaAs, **151**, L121
evolution of hole size and shape in {100}, {110} and {111} monocrystalline thin films of Au, **150**, 323
fundamental and practical aspects of alloying encapsulated Au-based contacts to GaAs, **149**, 251
in situ X-ray diffraction study of the effects of Ge and Ni concentrations on melting in Au-based contacts to GaAs, **147**, 177
role of In underlays in the prevention of thermal grooving in thin Au films, **149**, 29
role of preferred surface sites in the nucleation and growth of Au on NaCl

II: reanalysis of two comprehensive studies, **149**, 363
surface topography of pyrolytic C and of Au thin films by scanning tunnelling microscopy: grain boundaries and surface defects, **154**, 65
temperature-dependent resistivity measurements on polycrystalline SiO_2-covered thin Au films, **150**, 201
universal model for the nucleation of Au on NaCl, **149**, 113
Grain boundaries
grain boundary interdiffusion in Cd/Te thin film couples, **148**, 163
surface topography of pyrolytic C and of Au thin films by scanning tunnelling microscopy: grain boundaries and surface defects, **154**, 65
Graphite
high rate evaporation from graphite crucibles, **148**, 293
phase transition in adsorbed layers
VIII: evaluation of phase diagrams for monolayers of Ar, Kr and Xe adsorbed on graphite, **150**, 105
plasma-enhanced chemical vapour deposition on AlN coatings on graphite substrates, **146**, 255
Graphoepitaxy
onset of graphoepitaxy at a monatomic step, **146**, 175
Growth
electron spectroscopy study of the growth and thermally activated diffusion of Ni thin films on Al(111) and Al_2O_3/Al(111), **153**, 341
growth and properties of TiN and TiO_xN_y diffusion barriers in Si-on-sapphire integrated circuits, **153**, 287
optical and electrochemical investigation of oxide films on electrodeposited Sn–Ni alloy coatings
I: determination of composition and mechanism of growth of oxide films, **150**, 115
role of preferred surface sites in the nucleation and growth of Au on NaCl
II: reanalysis of two comprehensive studies, **149**, 363

H

Hard coatings
adhesion measurements of chemically vapour-deposited and physically vapour-deposited hard coatings on WC–Co substrates, **154**, 361
evaluation of adhesion strength of thin hard coatings, **154**, 387
hard Mo coatings prepared by cathodic magnetron sputtering, **153**, 281
high temperature microhardness of hard coatings produced by physical and chemical vapour deposition, **153**, 19
Hardening
solid solution hardening in high rate reactively sputtered (Hf, Ti)N coatings, **153**, 159
Hardness
high temperature microhardness of hard coatings produced by physical and chemical vapour deposition, **153**, 19
influence of the TiN deposition temperature on the critical load and hardness of hardened steels, **154**, 425
limits to the hardness testing of films thinner than 1 μm, **148**, 171
mechanical properties of thin films: measurements of ultramicroindentation hardness, Young's modulus and internal stress, **154**, 171
mechanical properties of wear-resistant coatings
I: modelling of hardness behaviour, **148**, 41
II: experimental studies and interpretation of hardness, **148**, 51
microhardness measurement on boron coating, **152**, L131
relationship between hardness and scratch adhesion, **154**, 403
surface hardness enhancement of Ti by an ion implantation technique, **146**, L33
ultramicrohardness of coated samples, **154**, 199
Heterojunctions
A-heterojunction and dielectrically insulated gate InP field effect transistors, **153**, 497
Hillocks
formation of whiskers and hillocks on the surface of thin films of Cu/Sn, **150**, 357
Holes
evolution of hole size and shape in {100}, {110} and {111} monocrystalline thin films of Au, **150**, 323
Hot-wall techniques
optical transitions in CdTe thin films produced by hot-wall vacuum evaporation, **147**, 9
Hydration
cadmium chloride thin films: hydration–dehydration, **150**, L93
Hydrogen
a.c. properties of polycrystalline GaAs and $(GaAs)_{1-x}(SiC_2{:}H)_x$ grown by metal–organic chemical vapour deposition, **146**, 241
effect of dilution gases in methane on the deposition of diamond-like C in a microwave discharge
II: effect of H_2, **146**, 283
influence of film thickness on the optical and electrical properties of a-Si:H, **150**, 1

influence of preparation parameters on the deposition rate, density and optical properties of thin a-Si:H films prepared by r.f. glow discharge, **149**, 331
interface defects introduced in Si/SiO_2 structures by H implantation, **150**, 303
optical gap of a-Si:H and polycrystalline Si between 4 and 973 K, **150**, 181
problems encountered during the measurement of the activation energy of dark conductivity of undoped a-Si:H films, **148**, 121
roll-to-roll preparation of an a-Si:H solar cell on a polymer film substrate, **146**, 75
structure and optical properties of a-C–Sn:H alloys prepared using the sputter-assisted plasma chemical deposition technique, **150**, 189
structure and physical properties of plasma-grown a-C:H films, **146**, 93
threshold energy for incorporation of reactive species in films of a-Si:H obtained by glow discharge silane decomposition, **151**, 263
Hydrogenation
comparative study of the properties of evaporated a-Si films before and after hydrogenation, **147**, 213
thermal annealing and hydrogenation of a-Si:H:Cl films, **147**, 285

I

Indium
A-heterojunction and dielectrically insulated gate InP field effect transistors, **153**, 497
amorphous-to-crystalline transition of indium oxide films deposited by reactive evaporation, **151**, 215
characterization of interface electrical properties in SiO_2/InSb metal/insulator/semiconductor structures prepared by plasma-enhanced chemical vapour deposition, **148**, 243
characterization of thin Al_2O_3 films on InP substrates by X-ray topography, **148**, L67
$Cu_xLi_{1-x}InTe_2$ epitaxial layers on $A^{III}B^{V}$ substrates and the influence of lattice misfit, **151**, 35
decoration of alkali halide crystals with In_2O_3 and SnO_2 by spraying technique, **146**, L23
effect of a finite r.f. conductance of native oxide on InP metal/insulator/semiconductor admittance, **150**, 227
effect of post-deposition aging on thin In films, **151**, 153
electrical properties of InSb metal/insulator/semiconductor diodes prepared by photochemical vapour deposition, **151**, 145
encapsulation and annealing studies of semi-insulating InP, **146**, 221
indium selenide film formation by the double-source evaporation of In and Se, **146**, 65
influence of substrate temperature and film thickness on the structure of reactively evaporated In_2O_3 films, **151**, 355
microstructure of In_2O_3:Sn films produced by the d.c. sputtering technique, **148**, 279
molecular beam epitaxy of $InAs/Sr_{1-x}Ba_xF_2/InAs$ structures, **149**, 205
optical absorption and photoconductivity in amorphous indium selenide thin films, **148**, 273
photovoltaic junctions between In_2O_3:Sn and Si, **149**, 283
physicochemical analysis of InAs gas phase epitaxy in the $InAs–AsCl_3–H_2$ system
I: thermodynamic considerations, **147**, 33
II: InAs transport and epitaxial growth kinetics, **147**, 41
plasma-assisted sulphuration of InP, **149**, 313
preparation, electrical properties and optical characterization of Cd_2SnO_4 and $CdIn_2O_4$ thin films as transparent and conductive coatings, **153**, 479
role of In underlays in the prevention of thermal grooving in thin Au films, **149**, 29
structure of $GaAs–In_{0.2}Ga_{0.8}As$ heterojunction interface studied by electron spectroscopies: X-ray photoelectron spectroscopy, tunable electron energy loss spectroscopy and Auger electron spectroscopy, **146**, 291
temperature dependence of transport properties in evaporated In_2O_3:Sn films, **148**, 7
thin transparent In_2O_3:Sn films as IR filters, **148**, L55
utilization of the diagram of condensed phases for the system In–P–S for the analysis of the composition of native sulphide films formed on InP, **150**, 347
Inhomogeneous films
model of an inhomogeneous film valid over a wide spectral domain and for any angle of incidence, **146**, 145
Insulators
influence of the spatially non-homogeneous trap distribution on the transient currents in insulating layers at high fields, **149**, 261
thin film transistors with Er_2O_3 gate insulators, **148**, 203
Integration
characterization of plasma-deposited silicon nitride coating used for integrated circuit encapsulation, **153**, 459

comparison of W film deposition techniques for very-large-scale integration technology, **153**, 469
growth and properties of TiN and TiO_xN_y diffusion barriers in Si-on-sapphire integrated circuits, **153**, 287
measurement of the distribution of Ar in sputter-deposited very-large-scale integration metallization, **153**, 401
Interfaces
Auger electron spectroscopy and capacitance–voltage investigation of the AlN–Si interface, **146**, 265
characterization of interface electrical properties in SiO_2/InSb metal/insulator/semiconductor structures prepared by plasma-enhanced chemical vapour deposition, **148**, 8
cross-sectional transmission electron microscopy characterization of the interface between plasma-sprayed TiC and Inconel, **154**, 91
high resolution electron microscopy and nanodiffraction study of the MgO–Al interface, **148**, 301
interface defects introduced in Si/SiO_2 structures by H implantation, **150**, 303
ion mixing of the interfaces between TiNi films and glass substrates, **147**, 93
measurement of preferred orientations in the Ag–silica interface, **151**, 65
structure of GaAs–$In_{0.2}Ga_{0.8}As$ heterojunction interface studied by electron spectroscopies: X-ray photoelectron spectroscopy, tunable electron energy loss spectroscopy and Auger electron spectroscopy, **146**, 291
surface and interface characterization of heat-treated (Ti, Al)N coatings on high speed steel substrates, **153**, 45
transmission electron microscopy for the determination of the microstructure of thin films and interfaces, **154**, 43
Interfacial properties
molecular structure and interfacial properties of surfactant-coated surfaces, **152**, 49
Intermetallic compounds
kinetics of the formation of intermetallic compounds in thin films of Cu/Sn, **148**, 111
Iodine
influence of I on electrical properties of lead phthalocyanine, **146**, 1
thin films of low temperature phase mercuric iodide, **151**, 429
Ion beams
analysis of the dose dependence of the thermoelectric power of ion-bombarded Bi/Sb thin films, **152**, 449
characteristic erosion of SiO_2 by oblique Ar ion beam bombardment, **147**, 153
intrinsic stress in AlN prepared by dual-ion-beam sputtering, **154**, 159
ion beam sputtering of ZnS thin films, **151**, 27
properties of a-C films deposited by ion beam methods, **148**, 311
stopping power measurements for mega-electronvolt $^4He^+$ ions via thin films of metals and binary metal alloys, **149**, 219
Ion implantation
interface defects introduced in Si/SiO_2 structures by H implantation, **150**, 303
structural transformation induced by N implantation in thin metal films, **147**, 49
surface hardness enhancement of Ti by an ion implantation technique, **146**, L33
Ion mixing
ion mixing of the interfaces between TiNi films and glass substrates, **147**, 93
Ion plating
metallization of polytetrafluoroethylene substrates by ion plating, **148**, 323
tempering effects in ion-plated TiN films: texture, residual stress, adhesion and colour, **146**, 165
$Ti_xAl_{1-x}N$ films deposited by ion plating with an arc evapor[illegible] **153**, 67
transport of evaporated materials through support gas in conjunction with ion plating
I, **149**, 225
II, **149**, 237
IR studies
Fourier transform IR reflection techniques for characterization of polyimide films on Cu substrates, **154**, 271
Iron
analysis of Co-doped iron oxide thin films by synchrotron radiation, **154**, 439
annealing behaviour and magnetic properties of Co/Pt and Fe/Pt bilayer thin films, **146**, 21
columnar structure and texture of Fe prepared at various evaporation rates, **147**, 299
deposition of Langmuir–Blodgett films of ferric stearate, **146**, L15
diffusion measurements in the metallic glass $Fe_{80}B_{20}$, **152**, 511
Fe and Ni thin film deposition via metallocene decomposition, **153**, 421
formation and magnetic properties of artificial superlattice of CoO–Fe_3O_4, **152**, 455
Lorentz microscopy studies of magnetic ripple in amorphous Fe–B–Si films, **147**, 1
phase transformation in plasma-sprayed iron oxide coatings, **154**, 57

J

Japan
molecular engineering in Japan—a prospect of research on Langmuir–Blodgett films, **152**, 305
Junctions
structure of GaAs–$In_{0.2}Ga_{0.8}As$ heterojunction interface studied by electron spectroscopies: X-ray photoelectron spectroscopy, tunable electron energy loss spectroscopy and Auger electron spectroscopy, **146**, 291

K

Kinetics
influence of the substrate on the crystallization kinetics of vapour-deposited a-Se films, **149**, L73
kinetics of the dry formation of Cu_2S in Cu_2S/CdS solar cells, **151**, 133
kinetics of the formation of intermetallic compounds in thin films of Cu/Sn, **148**, 111
kinetics of the formation of nickel aluminide coatings on pure Ni by chemical vapour deposition, **146**, 55
physicochemical analysis of InAs gas phase epitaxy in the InAs–$AsCl_3$–H_2 system
II: InAs transport and epitaxial growth kinetics, **147**, 41
role of carrier gas in the deposition kinetics of SiO_2 films produced by low temperature chemical vapour deposition, **146**, 183
Kirkendall effect
study of the Kirkendall effect in magnetic bilayers by spin wave resonance method, **146**, L37

L

Langmuir–Blodgett films
birefringence effects in metal overlayers on Langmuir–Blodgett films, **150**, 83
characterization of the structure of Langmuir–Blodgett films by short wavelength radiations, **152**, 165
defect characterization and detection in films, **152**, 155
deposition of Langmuir–Blodgett films of ferric stearate, **146**, L15
experimental criteria for monolayer studies in relation to the formation of Langmuir–Blodgett multilayers, **152**, 3
Langmuir–Blodgett films and black lipid membranes in biospecific surface-selective sensors, **152**, 345
Langmuir–Blodgett films and non-linear optics, **152**, 265
Langmuir–Blodgett films made from preformed polymers, **152**, 223
Langmuir–Blodgett multilayers of polymer–merocyanine-dye mixtures, **146**, 209
molecular engineering in Japan—a prospect of research on Langmuir–Blodgett films, **152**, 305
optimization of thermal performance of Langmuir–Blodgett film pyroelectric devices, **146**, 7
photoelectric properties of substituted silicon phthalocyanine Langmuir–Blodgett film Schottky barrier and metal/insulator/semiconductor devices, **149**, 163
pre-Langmuir–Blodgett monolayers, **152**, 29
pyroelectric behaviour of Langmuir–Blodgett films containing polar chromophores, **151**, 9
structure of Langmuir–Blodgett films, **152**, 151
Lasers
CdAs films prepared by pulsed laser evaporation: electrical properties and lattice parameters, **147**, L51
effect of laser irradiation on evaporated stearic acid, **146**, 109
film microanalysis using laser ablation and laser ionization mass spectrometry, **154**, 1
laser pulse vapour deposition of polycrystalline wurtzite-type BN, **147**, L45
Lattice parameters
CdAs films prepared by pulsed laser evaporation: electrical properties and lattice parameters, **147**, L51
Layers
advanced layer material constitution, **153**, 11
Lead
gas-sensitive field effect transistor utilizing a thin film of lead phthalocyanine as the gate material, **151**, L111
influence of I on electrical properties of lead phthalocyanine, **146**, 1
studies on $PbCl_2$ thin film galvanic cells, **151**, 325
sublimation of cleaved surfaces of Zn and galena single crystals
I: experimental, **147**, 57
Lipids
Langmuir–Blodgett films and black lipid membranes in biospecific surface-selective sensors, **152**, 345
lipid-based tubule microstructures, **152**, 181
Lithium
adsorption of Li and O_2 on GaAs, **152**, 545
$Cu_xLi_{1-x}InTe_2$ epitaxial layers on $A^{III}B^{V}$ substrates and the influence of lattice misfit, **151**, 35

Load
adhesion testing by the scratch test method: the influence of intrinsic and extrinsic parameters on the critical load, **154**, 333
influence of the TiN deposition temperature on the critical load and hardness of hardened steels, **154**, 425
Luminescence
mechanisms of temperature quenching of luminescence due to deep centres in $CdSe_xTe_{1-x}$ $(0<x<1)$ alloys, **146**, 233

M

Magnesium
evaporation-boat-induced UV losses in MgF_2 thin films, **152**, L139
high resolution electron microscopy and nano-diffraction study of the MgO–Al interface, **148**, 301
thick Mg films produced by deposition techniques, **152**, 525
Magnetic properties
annealing behaviour and magnetic properties of Co/Pt and Fe/Pt bilayer thin films, **146**, 21
bistable reflection and plane transverse magnetic wave passage in a dimensionally quantized film, **147**, 103
formation and magnetic properties of artificial superlattice of $CoO–Fe_3O_4$, **152**, 455
Lorentz microscopy studies of magnetic ripple in amorphous Fe–B–Si films, **147**, 1
magnetic properties and microstructure of sputtered Co–Cr films, **147**, 231
magnetic properties of d.c.-magnetron-sputtered CoCr thin films, **154**, 431
measurement of saturation magnetostriction of a thin amorphous film by means of small angle magnetization oscillation, **148**, 1
study of the Kirkendall effect in magnetic bilayers by spin wave resonance method, **146**, L37
Manganese
growth of epitaxial $Cd_{1-x}Mn_xTe$ films by hot-wall evaporation, **150**, 337
Mass spectrometry
three-dimensional secondary ion mass spectrometry analysis of surface-modified materials and the application to ^{13}C-implanted steels, **153**, 197
Mechanical properties
mechanical properties and microstructures of Al–1%Si thin film metallizations, **150**, 237
mechanical properties of thin films: a review, **154**, 109
mechanical properties of thin films: measurements of ultramicroindentation hardness, Young's modulus and internal stress, **154**, 171
mechanical properties of wear-resistant coatings
I: modelling of hardness behaviour, **148**, 41
II: experimental studies and interpretation of hardness, **148**, 51
structure–mechanical property relationship of a-SiO thin films, **154**, 149
thin film characterization using a mechanical properties microprobe, **153**, 185
Membranes
Langmuir–Blodgett films and black lipid membranes in biospecific surface-selective sensors, **152**, 345
oriented ultrathin membranes from monomeric and polymeric amphiphiles: monolayers, liposomes and multilayers, **152**, 207
Mercury
thin films of low temperature phase mercuric iodide, **151**, 429
Merocyanine dye
Langmuir–Blodgett multilayers of polymer–merocyanine-dye mixtures, **146**, 209
Metal films
near-IR surface impedance of thin metallic films with unlike surfaces, **152**, 411
structural transformation induced by N implantation in thin metal films, **147**, 49
temperature effects in thin metal films, **148**, 343
transmittance of thin metal films near the percolation threshold, **152**, 465
Metal/insulator/semiconductor structures
characterization of interface electrical properties in SiO_2/InSb metal/insulator/semiconductor structures prepared by plasma-enhanced chemical vapour deposition, **148**, 243
effect of the nature of the counterelectrode on the current–voltage characteristics of thin film Al/Al_2O_3/Te structures, **148**, 261
Metal/oxide/semiconductor structures
current–voltage spectra of metal/oxide/SnTe diodes
I: experiments, **149**, 143
degradation of metal/oxide/semiconductor structures by Fowler–Nordheim tunnelling injection, **148**, 149
Metallic particles
concentration of free metallic particles in thin Al_2O_3 films, **150**, L101
Metallization
measurement of the distribution of Ar in sputter-deposited very-large-scale integration metallization, **153**, 401

mechanical properties and microstructures of Al–1%Si thin film metallizations, **150**, 237
metallization of polytetrafluoroethylene substrates by ion plating, **148**, 323
wafer back metallization for semiconductor packaging, **153**, 447
Metallocene
Fe and Ni thin film deposition via metallocene decomposition, **153**, 421
Metals
resistivity, temperature coefficient of resistivity and thermoelectric power of thin continuous metal films
II: a methodology for computer processing of thin film data to extract parameters with associated error estimates, **150**, 163
stopping power measurements for meg electronvolt $^4He^+$ ions via thin films of metals and binary metal alloys, **149**, 219
Methane
effect of dilution gases in methane on the deposition of diamond-like C in a microwave discharge
II: effect of H_2, **146**, 283
Microanalysis
film microanalysis using laser ablation and laser ionization mass spectrometry, **154**, 1
Microprobe
thin film characterization using a mechanical properties microprobe, **153**, 185
Microstructure
effects of processing parameters on the microstructure and properties of sputter-deposited TiW thin film diffusion barriers, **153**, 313
effects of substrate bias on the resistivity and microstructure of Mo and molybdenum silicide films, **153**, 359
effects of substrate temperature on Cu distribution, resistivity and microstructure in magnetron-sputtered Al–Cu films, **153**, 409
interrelationship between internal stress, processing parameters and microstructure of physically vapour-deposited and thermally sprayed coatings, **154**, 125
lipid-based tubule microstructures, **152**, 181
mechanical properties and microstructures of Al–1%Si thin film metallizations, **150**, 237
microstructure and physical properties of polycrystalline metastable $Ti_{0.5}Al_{0.5}N$ alloys grown by d.c. magnetron sputter deposition, **153**, 55
microstructure of In_2O_3:Sn films produced by the d.c. sputtering technique, **148**, 279
microstructure of boron-doped silicon layers prepared by low pressure chemical vapour deposition, **150**, 69
relationship between substrate bias and microstructure in magnetron-sputtered Al–Cu films, **154**, 81
topography and microstructure of Cu–Sn coatings deposited by magnetron sputtering, **151**, 235
transmission electron microscopy for the determination of the microstructure of thin films and interfaces, **154**, 43
Mobility
comments on Bak's model of the field-dependent mobility in organic layers
II: reply to the author's latest remarks, **146**, L7
drift mobility in a-Se_{1-x}–Te_x/Se double-layer xerographic photoreceptors, **148**, 10
remarks about "Comments on Bak's model ..." by Mycielski, **146**, L1
Molecular beam epitaxy
molecular beam epitaxy of InAs/$Sr_{1-x}Ba_xF_2$/InAs structures, **149**, 205
ZnS molecular beam epitaxy on Si substrates, **151**, 207
Molecular engineering
molecular engineering in Japan—a prospect of research on Langmuir–Blodgett films, **152**, 305
molecular engineering of ultrathin polymeric films: a synopsis, **152**, 405
Molecular structure
molecular structure and interfacial properties of surfactant-coated surfaces, **152**, 49
Raman enhancement methods for molecular structure characterization of optical thin films, **154**, 257
Molybdenum
effects of substrate bias on the resistivity and microstructure of Mo and molybdenum silicide films, **153**, 359
electrical properties of multilayered Al/Ni and Al/Mo films, **146**, 155
fundamental aspects of the electronic structure, materials properties and lubrication performance of sputtered MoS_2 films, **154**, 309
hard Mo coatings prepared by cathodic magnetron sputtering, **153**, 281
influence of the substrate temperature on the properties of $MoSi_2$ thin films, **149**, 61
plasma-enhanced chemical vapour deposition of Mo, **147**, 193
sputtering of Mo–Si layers from composite targets, **149**, 211
statistical study of the combined effects of

substrate temperature, bias, annealing and a Cr_3Si_2 undercoating on the tribological properties of r.f.-sputtered MoS_2 coatings, **154**, 323
transport in refractory metals and their interaction with SiO_2: comparison of W and Mo, **153**, 349
Monatomic step
onset of graphoepitaxy at a monatomic step, **146**, 175
Monolayers
experimental considerations in insoluble spread monolayers, **152**, 9
experimental criteria for monolayer studies in relation to the formation of Langmuir–Blodgett multilayers, **152**, 3
orientational effects in adsorption
III: in-plane ordering in localized monolayers of diatomic molecules on crystalline solids, **150**, 89
oriented ultrathin membranes from monomeric and polymeric amphiphiles: monolayers, liposomes and multilayers, **152**, 207
phase transition in adsorbed layers
VIII: evaluation of phase diagrams for monolayers of Ar, Kr and Xe adsorbed on graphite, **150**, 105
pre-Langmuir–Blodgett monolayers, **152**, 29
Morphology
morphological transformations of thin heteroepitaxial films, **151**, 275
morphology and structure of chemically vapour-deposited Ti(C, N) coatings, **146**, 45
orientation and morphology of Cr deposits on hot Cu{111} substrates, **146**, 299
Multilayers
experimental criteria for monolayer studies in relation to the formation of Langmuir–Blodgett multilayers, **152**, 3
growth and optical characterization of spin-coated As_2S_3 multilayer thin films, **147**, 275
influence of the individual layer thickness on the depth resolution determined sputter depth profiling of multilayers, **146**, L11
Langmuir–Blodgett multilayers of polymer–merocyanine-dye mixtures, **146**, 209
oriented ultrathin membranes from monomeric and polymeric amphiphiles: monolayers, lipsosomes and multilayers, **152**, 207

N

Nickel
acid corrosion behaviour of amorphous and crystalline $Ti_{75}Ni_{20}Si_5$ alloys, **149**, 171
characterization of Ni–Cr thin films by X-ray analysis, **148**, 209
electrical properties of multilayered Al/Ni and Al/Mo films, **146**, 155
electron spectroscopy study of the growth and thermally activated diffusion of Ni thin films on Al(111) and Al_2O_3/Al(111), **153**, 341
Fe and Ni thin film deposition via metallocene decomposition, **153**, 421
in situ X-ray diffraction study of the effects of Ge and Ni concentrations on melting in Au-based contacts to GaAs, **147**, 177
investigation of amorphous $Ni_{0.60}Nb_{0.40}$ diffusion barriers, **150**, 245
ion mixing of the interfaces between TiNi films and glass substrates, **147**, 93
kinetics of the formation of nickel aluminide coatings on pure Ni by chemical vapour deposition, **146**, 55
optical and electrochemical investigation of oxide films on electrodeposited Sn–Ni alloy coatings
I: determination of composition and mechanism of growth of oxide films, **150**, 115
stress rupture and creep behaviour of a low pressure plasma-sprayed NiCoCrAlY coating alloy in air and vacuum, **147**, 143
structure of sputtered Ni_2P films, **149**, 303
study of crack initiation and propagation in Ni–Cr thermally sprayed coatings using acoustic emission techniques, **153**, 243
temperature-dependent resistivity measurements on polycrystalline SiO_2-covered thin Ni films, **150**, 209
ternary alloy films of Ni–Cr–Al for thin film resistors, **146**, 133
wear resistance of metastable Ni–B alloys produced by chemical vapour deposition, **153**, 267
Niobium
chemical vapour deposition of superconducting Nb_3Ge controlled by diffusion in gas phase, **150**, 311
effect of the deposition rate on the properties of d.c.-magnetron-sputtered niobium nitride thin films, **152**, 535
formation of titanium, chromium, niobium and zirconium aluminides in thin films for interconnections, **149**, 269
investigation of amorphous $Ni_{0.60}Nb_{0.40}$ diffusion barriers, **150**, 245
Nitrogen
adhesion and structure of TiN arc coatings, **153**, 135
Auger electron spectroscopy and Rutherford backscattering spectroscopy studies of TiN

and TiC coatings prepared by the activated reactive evaporation process, **153**, 149
Auger electron spectroscopy and capacitance–voltage investigation of the AlN–Si interface, **146**, 265
cathodic arc plasma deposition of TiC and TiC_xN_{1-x} films, **153**, 209
characterization of plasma-deposited silicon nitride coating used for integrated circuit encapsulation, **153**, 459
chemical analysis of TiN films: a round robin experiment, **153**, 169
composition and properties of SiN_x films produced by reactive r.f. magnetron sputtering, **151**, 223
compressive stress of thin cubic BN films prepared by r.f. reactive sputtering on r.f.-biased substrates, **149**, L77
effect of N content on the critical normal force in scratch testing of Ti–N films, **154**, 351
effect of the deposition rate on the properties of d.c.-magnetron-sputtered niobium nitride thin films, **152**, 535
growth and properties of TiN and TiO_xN_y diffusion barriers in Si-on-sapphire integrated circuits, **153**, 287
influence of the TiN deposition temperature on the critical load and hardness of hardened steels, **154**, 425
intrinsic stress in AlN prepared by dual-ion-beam sputtering, **154**, 159
laser pulse vapour deposition of polycrystalline wurtzite-type BN, **147**, L45
lattice vacancies in TiN and HfN films: a study by positron annihilation, **153**, 103
low temperature NH_3 adsorption on clean amorphous and crystalline Si surfaces and N bonding in a-Si_3N_4:H: a comparative X-ray photoelectron spectroscopy study, **149**, 385
microstructure and physical properties of polycrystalline metastable $Ti_{0.5}Al_{0.5}N$ alloys grown by d.c. magnetron sputter deposition, **153**, 55
morphology and structure of chemically vapour-deposited Ti(C, N) coatings, **146**, 45
plasma conditions for the deposition of TiN by biased activated reactive evaporation and dependence of the resistivity on preferred orientation, **153**, 115
plasma-enhanced chemical vapour deposition of AlN coatings on graphite substrates, **146**, 255
plasma-enhanced chemical vapour deposition of silicon nitride from 1,1,3,3,5,5-hexamethylcyclotrisilazane and NH_3, **153**, 521
plasma-enhanced deposition of silicon oxynitride films, **148**, 285
preparation and properties of cubic boron nitride coatings, **153**, 487
preparation of cubic boron nitride films by reactive diode sputtering, **151**, 243
properties of physically vapour-deposited Ti–Al–V–N coatings, **153**, 83
reactive arc vapour ion deposition of TiN, ZrN and HfN, **153**, 75
solid solution hardening in high rate reactively sputtered (Hf, Ti)N coatings, **153**, 159
stoichiometry in Ti–N barrier layers studied by X-ray emission spectroscopy, **153**, 303
structural transformation induced by N implantation in thin metal films, **147**, 49
surface and interface characterization of heat-treated (Ti, Al)N coatings on high speed steel substrates, **153**, 45
tempering effects in ion-plated TiN films: texture, residual stress, adhesion and colour, **146**, 165

measurement of preferred orientations in the Ag–silica interface, **151**, 65
metal–insulator phase transition in VO_2: influence of film thickness and substrate, **150**, 11
microstructure of In_2O_3:Sn films produced by the d.c. sputtering technique, **148**, 279
optical and electrochemical investigation of oxide films on electrodeposited Sn–Ni alloy coatings
I: determination of composition and mechanism of growth of oxide films, **150**, 115
optical properties and structure of thin SiO_x films, **151**, 317
phase transformation in plasma-sprayed iron oxide coatings, **154**, 57
photoinduced effect on phase transition in Ag_3VO_4 thin films, **149**, L85
photovoltaic junctions between In_2O_3:Sn and Si, **149**, 283
physical properties of ZnO sputtered films, **150**, 291
plasma-enhanced deposition of silicon oxynitride films, **148**, 285
preparation, electrical properties and optical characterization of Cd_2SnO_4 and $CdIn_2O_4$ thin films as transparent and conductive coatings, **153**, 479
production of silicon oxides from the glow discharge decomposition of a silane and NO_2, **147**, 259

properties of electron-beam-evaporated tin oxide films, **147**, 321
properties of tin oxide films prepared by reactive electron beam evaporation, **149**, 291
role of carrier gas in the deposition kinetics of SiO_2 films produced by low temperature chemical vapour deposition, **146**, 183
stability of plasma-deposited SiO_2 films evaluated using stress and IR measurements, **149**, 85
structure and optical properties of WO_3 thin films prepared by chemical vapour deposition, **147**, 131
structure, internal stresses, adhesion and wear resistance of sputtered alumina coatings, **153**, 123
structure–mechanical property relationship of a-SiO thin films, **154**, 149
temperature dependence of transport properties in evaporated In_2O_3:Sn films, **148**, 7
temperature-dependent resistivity measurements on polycrystalline SiO_2-covered thin Ni films, **150**, 209
temperature-dependent resistivity measurements on polycrystalline SiO_2-covered thin Au films, **150**, 201
thin film transistors with Er_2O_3 gate insulators, **148**, 203
thin transparent In_2O_3:Sn films as IR filters, **148**, L55
transport in refractory metals and their interaction with SiO_2: comparison of W and Mo, **153**, 349
voltaic cells of $(Zn_xCu_y)O_z$ thin films deposited by r.f. sputtering, **152**, 443
X-ray diffraction studies of Bi_2O_3 films prepared by reactive and activated reactive evaporation, **148**, 181

Oxygen
adsorption of Li and O_2 on GaAs, **152**, 545
low temperature O_2 dissolution in Ti, **146**, 201
study of O_2 interaction with GaSb cleaved surfaces by work function and photovoltage measurements, **151**, 103

P

Palladium
effect of mica surface "dehydroxylation" on particulate Pd vapour deposits, **151**, 365
electrochemical adjustment of thin film Ti–Pd resistors, **153**, 387
investigation of d.c. planar-magnetron-sputtered Pd films by spectroscopic ellipsometry, **154**, 281

Particles
percolation of interacting particles deposited onto a planar substrate, **151**, 121

Phase diagrams
phase transition in adsorbed layers
VIII: evaluation of phase diagrams for monolayers of Ar, Kr and Xe adsorbed on graphite, **150**, 105
utilization of the diagram of condensed phases of the system In–P–S for the analysis of the composition of native sulphide films formed on InP, **150**, 347

Phase transformation
phase transformation in plasma-sprayed iron oxide coatings, **154**, 57

Phase transitions
metal–insulator phase transition in VO_2: influence of film thickness and substrate, **150**, 11
phase transition in adsorbed layers
VII: a model for mixed gas adsorption on solid surfaces, **147**, 333
VIII: evaluation of phase diagrams for monolayers of Ar, Kr and Xe adsorbed on graphite, **150**, 105
photoinduced effect on phase transition in Ag_3VO_4 thin films, **149**, L85

Phases
metastable phases in vapour-deposited Al–Zr thin films, **146**, 273

Phosphorus
A-heterojunction and dielectrically insulated gate InP field effect transistors, **153**, 497
characterization of thin Al_2O_3 films on InP substrates by X-ray topography, **148**, L67
determination of the refractive index profile of As-implanted GaP by ellipsometry, **148**, 135
effect of a finite r.f. conductance of native oxide on InP metal/insulator/semiconductor admittance, **150**, 227
encapsulation and annealing studies of semi-insulating InP, **146**, 221
P-doped Si films prepared by low pressure chemical vapour deposition, **148**, L63
plasma-assisted sulphuration of InP, **149**, 313
structure of sputtered Ni_2P films, **149**, 303
study of the gap states in vacuum-deposited Zn_3P_2 Schottky barriers using admittance spectroscopy, **149**, 1
utilization of the diagram of condensed phases for the system In–P–S for the analysis of the composition of native sulphide films formed on InP, **150**, 347

Photoconductivity
optical absorption and photoconductivity in amorphous indium selenide thin films, **148**, 273

resistivity and photoconductivity of plasma-sprayed polycrystalline Si, **151**, 343
transient photoconductivity in amorphous thin films of $Ge_{22}Se_{78}$, **151**, 307
Photoelectric properties
photoconduction on photo-oxidized Te thin films, **148**, 29
photoelectric properties of substituted silicon phthalocyanine Langmuir–Blodgett film Schottky barrier and metal/insulator/semiconductor devices, **149**, 163
Photoelectron spectroscopy
angle-dependent X-ray photoelectron spectroscopy investigation of GaAs surfaces, **154**, 301
low temperature NH_3 adsorption on clean amorphous and crystalline Si surfaces and N bonding in a-Si_3N_4:H: a comparative X-ray photoelectron spectroscopy study, **149**, 385
Photoinduced effect
photoinduced effect on phase transition in Ag_3VO_4 thin films, **149**, L85
Photonic devices
future trends of cross-sectional transmission electron microscopy for electronic and photonic devices, **154**, 75
Photoreceptors
drift mobility in a-Se_{1-x}–Te_x/Se double-layer xerographic photoreceptors, **148**, 251
Photosensitivity
photosensitive properties of organometallic films of silver anthraquinone derivatives, **150**, 175
Photovoltaic effect
anomalous photovoltaic effect in vacuum-deposited CdTe films, **150**, 217
photovoltaic junctions between In_2O_3:Sn and Si, **149**, 283
Phthalocyanine
electrical and optical properties of phthalocyanine films, **149**, 129
formation of Si (phthalocyaninato)$(OH)_2$ and $[Si(phthalocyaninato)O]_n$ films and their optical and electrical properties, **151**, L115
gas-sensitive field effect transistor utilizing a thin film of lead phthalocyanine as the gate material, **151**, L111
influence of I on electrical properties of lead phthalocyanine, **146**, 1
photoelectric properties of substituted silicon phthalocyanine Langmuir–Blodgett film Schottky barrier and metal/insulator/semiconductor devices, **149**, 163
preparation of highly ordered ultrathin films of copper(II) phthalocyanine on amorphous substrate by molecular beam deposition, **151**, L109
Physical properties
microstructure and physical properties of polycrystalline metastable $Ti_{0.5}Al_{0.5}N$ alloys grown by d.c. magnetron sputter deposition, **153**, 55
physical properties of ZnO sputtered films, **150**, 291
quantification of physical properties of thin films, **154**, 21
Physical vapour deposition
interrelationship between internal stress, processing parameters and microstructure of physically vapour-deposited and thermally sprayed coatings, **154**, 125
Planarization
planarization of Al alloy film during high rate sputtering, **153**, 369
Plasma deposition
cathodic arc plasma deposition of TiC and TiC_xN_{1-x} films, **153**, 209
characterization of plasma-deposited silicon nitride coating used for integrated circuit encapsulation, **153**, 459
etching and deposition phenomena in an r.f. CH_4 plasma, **147**, 83
plasma-assisted sulphuration of InP, **149**, 313
plasma conditions for the deposition of TiN by biased activated reactive evaporation and dependence of the resistivity on preferred orientation, **153**, 115
plasma-enhanced chemical vapour deposition of AlN coatings on graphite substrates, **146**, 255
plasma-enhanced chemical vapour deposition of Mo, **147**, 193
plasma-enhanced chemical vapour deposition of silicon nitride from 1,1,3,3,5,5-hexamethylcyclotrisilazane and NH_3, **153**, 521
plasma-enhanced deposition of silicon oxynitride films, **148**, 285
TiN coatings on M2 steel produced by plasma-assisted chemical vapour deposition, **154**, 377
Plasma polymerization
preparation and electrical properties of plasma-polymerized copper acetylacetonate thin films, **151**, 71
Plasma spraying
plasma-sprayed high T_c superconductor coating, **152**, L143
stress rupture and creep behaviour of a low pressure plasma-sprayed NiCoCrAlY coating alloy in air and vacuum, **147**, 143

Platinum
annealing behaviour and magnetic properties of Co/Pt and Fe/Pt bilayer thin films, **146**, 21
Auger electron spectroscopy, X-ray photoelectron spectroscopy, work function measurement and photoemission of adsorbed Xe on thin films of Pt–Re(111) alloys, **151**, 251
study of the initial aluminide phase growth in Al/Pt couples, **153**, 379
Polyester
aluminized polyester films: influence of substrate on metal texture, **149**, 105
Polymers
chemistry of polymer molecules for ultrathin films, **152**, 99
Fourier transform IR reflection techniques for characterization of polyimide films on Cu substrates, **154**, 271
future applications of ordered polymeric thin films, **152**, 377
Langmuir–Blodgett films made from preformed polymers, **152**, 223
Langmuir–Blodgett multilayers of polymer–merocyanine-dye mixtures, **146**, 209
metallization of polytetrafluoroethylene substrates by ion plating, **148**, 323
molecular engineering of ultrathin polymeric films: a synopsis, **152**, 405
non-linear optical effects in thin organic polymeric films, **152**, 275
optical second-harmonic generation as an orientational probe in poled polymers, **152**, 295
roll-to-roll preparation of an a-Si:H solar cell on a polymer film substrate, **146**, 75
transparent carbon film electrodes for IR investigations of PVDF, **152**, L135
Profile
calculation of the profile of thin films deposited by evaporation under vacuum from cylindrical creusets, **150**, 369
Proteins
thin organic films of proteins, **152**, 335
Pyroelectric devices
optimization of thermal performance of Langmuir–Blodgett film pyroelectric devices, **146**, 7

Q

Quantification
quantification of physical properties of thin films, **154**, 21
Quenching
mechanisms of temperature quenching of luminescence due to deep centres in $CdSe_xTe_{1-x}$ $(0<x<1)$ alloys, **146**, 233

R

Radiation damage
radiation damage effects in GaAs transmission electron microscopy specimens prepared by ion milling, **149**, 73
Raman studies
Raman characterization of optical thin film coatings, **154**, 239
Raman enhancement methods for molecular structure characterization of optical thin films, **154**, 257
Raman microprobe study of Si- and Ge-on-insulator structures, **154**, 249
Rare earth metals
comparative study of thin film transistors using rare earth oxides as gates, **147**, 213
films of rare earth oxides formed by electron beam evaporation, **154**, 101
Reactive evaporation
Auger electron spectroscopy and Rutherford backscattering spectroscopy studies of TiN and TiC coatings prepared by the activated reactive evaporation process, **153**, 149
plasma conditions for the deposition of TiN by biased activated reactive evaporation and dependence of the resistivity on preferred orientation, **153**, 115
Reflection
bistable reflection and plane transverse magnetic wave passage in a dimensionally quantized film, **147**, 103
Reflectometry
complete optical analysis of a non-absorbing thin film on an absorbing substrate by a new method of immersion spectroscopic reflectometry, **148**, 17
Refractive index
determination of the refractive index profile of As-implanted GaP by ellipsometry, **148**, 135
Refractory metals
transport in refractory metals and their interaction with SiO_2: comparison of W and Mo, **153**, 349
Resistors
electrochemical adjustment of thin film Ti–Pd resistors, **153**, 387
new model for electron movement in a thick film resistor and its application to analysis of the structure and conduction mechanism in these resistors, **152**, 487
ternary alloy films of Ni–Cr–Al for thin film resistors, **146**, 133
Resists
plasma-polymerized electron beam resists prepared from methyl methacrylate using vari-

ous carrier gases, **149**, 341
Rheotaxy
thin polycrystalline Si films grown by quasi-rheotaxy on Al-covered glass substrates, **147**, 251
Ring structures
investigation of ring structures for metal–semiconductor contact resistance determination, **146**, 15
Rutherford backscattering spectroscopy
Auger electron spectroscopy and Rutherford backscattering spectroscopy studies of TiN and TiC coatings prepared by the activated reactive evaporation process, **153**, 149

S

Sapphire
temperature dependence of electrical conduction in discontinuous Ag films on sapphire substrates, **148**, 233
Scanning acoustic microscopy
imaging and characterization of film coating using scanning acoustic microscopy, **154**, 207
Schottky barriers
photoelectric properties of substituted silicon phthalocyanine Langmuir–Blodgett film Schottky barrier and metal/insulator/semiconductor devices, **149**, 163
study of the gap states in vacuum-deposited Zn_3P_2 Schottky barriers using admittance spectroscopy, **149**, 1
Scratch testing
adhesion testing by the scratch test method: the influence of intrinsic and extrinsic parameters on the critical load, **154**, 333
effect of N content on the critical normal force in scratch testing of Ti–N films, **154**, 351
relationship between hardness and scratch adhesion, **154**, 403
Selective surfaces
comment on "Spectrally selective surfaces on stainless steel produced by chemical conversion", **151**, L125
growth of selective coatings on stainless steel, **151**, 413
spectrally selective surfaces on stainless steel produced by chemical conversion, **147**, 243
Selenium
Auger electron spectroscopic investigations of the influence of deposition parameters on the stoichiometry of n-CdSe films electrodeposited from low purity materials, **150**, 51
drift mobility in a-$Se_{1-x}Te_x$/Se double-layer xerographic photoreceptors, **148**, 251
effect of Cl on electrophotographic properties of Se–Te alloy, **149**, 9
effect of ultrathin Se overcoat on the stability of Te-based optical recording media, **154**, 447
electric field dependence of conductivity in thin amorphous films and bulk glasses in the system $Ge_4Se_{6-x}Te_x$, **150**, 135
indium selenide film formation by the double-source evaporation of In and Se, **146**, 65
influence of preparation technique on the conductivity of thin amorphous $Ge_4Se_{6-x}Te_x$ films, **150**, 125
influence of the substrate on the crystallization kinetics of vapour-deposited a-Se films, **149**, L73
mechanism for CdSe deposition by fused salt electrolysis, **147**, 65
mechanisms of temperature quenching of luminescence due to deep centres in $CdSe_xTe_{1-x}$ $(0<x<1)$ alloys, **146**, 233
optical absorption and photoconductivity in amorphous indium selenide thin films, **148**, 273
optical properties of $AgGaSe_2$ thin films, **148**, 143
optically monitored electrodeposition of thin CdSe films, **147**, 291
properties of chemically deposited $Cu_{2-x}Se$ thin films, **150**, L89
SnSe thin films synthesized by solid state reactions, **149**, 197
solution growth technique for the deposition of cobalt selenide thin film, **149**, L81
structural phototransformations in thin Se films, **151**, 111
transient photoconductivity in amorphous thin films of $Ge_{22}Se_{78}$, **151**, 307
Semiconductor properties
semiconductor properties of a-C–Sn thin films, **146**, L19
Semiconductors
wafer back metallization for semiconductor packaging, **153**, 447
Sensors
gas-sensitive field effect transistor utilizing a thin film of lead phthalocyanine as the gate material, **151**, L111
Langmuir–Blodgett films and black lipid membranes in biospecific surface-selective sensors, **152**, 345
Silazane
plasma-enhanced chemical vapour deposition of silicon nitride from 1,1,3,3,5,5-hexamethylcyclotrisilazane and NH_3, **153**, 521
Silicon
a.c. conduction in SiO_x films of variable composition, **151**, L105

a.c. properties of polycrystalline GaAs and $(GaAs)_{1-x}(SiC_2:H)_x$ grown by metal–organic chemical vapour deposition, **146**, 241
acid corrosion behaviour of amorphous and crystalline $Ti_{75}Ni_{20}Si_5$ alloys, **149**, 171
Auger electron spectroscopy and capacitance–voltage investigation of the AlN–Si interface, **146**, 265
characteristic erosion of SiO_2 by oblique Ar ion beam bombardment, **147**, 153
characterization of interface electrical properties in SiO_2/InSb metal/insulator/semiconductor structures prepared by plasma-enhanced chemical vapour deposition, **148**, 243
characterization of plasma-deposited silicon nitride coating used for integrated circuit encapsulation, **153**, 459
characterization of titanium silicide films formed by composite sputtering and rapid thermal annealing, **151**, 51
comparative study of the properties of evaporated a-Si films before and after hydrogenation, **147**, 213
composition and properties of SiN_x films produced by reactive r.f. magnetron sputtering, **151**, 223
crystallization behaviour of amorphous SiC films prepared by r.f. sputtering, **151**, 403
effects of bond strain on the properties of plasma-deposited silicon oxide films, **150**, L97
effects of substrate bias on the resistivity and microstructure of Mo and molybdenum silicide films, **153**, 359
formation and oxidation mechanisms in two semiconducting silicides, **151**, 41
formation of Si(phthalocyaninato)$(OH)_2$ and $[Si(phthalocyaninato)O]_n$ films and their optical and electrical properties, **151**, L115
influence of film thickness on optical and electrical properties of a-Si:H, **150**, 1
influence of preparation parameters on the deposition rate, density and optical properties of thin a-Si:H films prepared by r.f. glow discharge, **149**, 331
influence of the substrate temperature on the properties of $MoSi_2$ thin films, **149**, 61
interface defects introduced in Si/SiO_2 structures by H implantation, **150**, 303
Lorentz microscopy studies of magnetic ripple in amorphous Fe–B–Si films, **147**, 1
low temperature NH_3 adsorption on clean amorphous and crystalline Si surfaces and N bonding in a-Si_3N_4:H: a comparative X-ray photoelectron spectroscopy study, **149**, 385
measurement of optical losses and damage resistance of $ZnS–Na_3AlF_6$ and $TiO_2–SiO_2$ laser mirrors depending on coating design, **152**, 433
measurement of preferred orientations in the Ag–silica interface, **151**, 65
mechanical properties and microstructures of Al–1%Si thin film metallizations, **150**, 237
microstructure of B-doped Si layers prepared by low pressure chemical vapour deposition, **150**, 69
optical properties and structure of thin SiO_x films, **151**, 317
P-doped Si films prepared by low pressure chemical vapour deposition, **148**, L63
photoelectric properties of substituted silicon phthalocyanine Langmuir–Blodgett film Schottky barrier and metal/insulator/semiconductor devices, **149**, 163
photovoltaic junctions between In_2O_3:Sn and Si, **149**, 283
plasma-enhanced chemical vapour deposition of silicon nitride from 1,1,3,3,5,5-hexamethylcyclotrisilazane and NH_3, **153**, 521
plasma-enhanced deposition of silicon oxynitride films, **148**, 285
problems encountered during the measurement of the activation energy of dark conductivity of undoped a-Si:H films, **148**, 121
production of silicon oxides from the glow discharge decomposition of a silane and NO_2, **147**, 259
r.f.-sputtered SiC coatings on C fibres, **148**, 93
Raman microprobe study of Si- and Ge-on-insulator structures, **154**, 249
rapid thermal anneal of As implanted into Si(100) and Si(111), **149**, 189
resistivity and photoconductivity of plasma-sprayed polycrystalline Si, **151**, 343
rhombohedral distortion of EuS epitaxial films on Si(111) substrates, **151**, 191
role of carrier gas in the deposition kinetics of SiO_2 films produced by low temperature chemical vapour deposition, **146**, 183
roll-to-roll preparation of an a-Si:H solar cell on a polymer film substrate, **146**, 75
sputtering of Mo–Si layers from composite targets, **149**, 211
stability of plasma-deposited SiO_2 films evaluated using stress and IR measurements, **149**, 85
statistical study of the combined effects of substrate temperature, bias, annealing and a Cr_3Si_2 undercoating on the tribological properties of r.f.-sputtered MoS_2 coatings, **154**, 323

structure–mechanical property relationship of a-SiO thin films, **154**, 149
temperature-dependent resistivity measurements on polycrystalline SiO_2-covered thin Ni films, **150**, 209
temperature-dependent resistivity measurements on polycrystalline SiO_2-covered thin Au films, **150**, 201
tensimetric investigation of silicon nitride films, **147**, 267
thermal annealing and hydrogenation of a-Si:H:Cl films, **147**, 285
thermal nitridation of Ar-implanted Si, **148**, 75
thin polycrystalline Si films grown by quasi-rheotaxy on Al-covered glass substrates, **147**, 251
threshold energy for incorporation of reactive species in films of a-Si:H obtained by glow discharge silane decomposition, **151**, 265
transport in refractory metals and their interaction with SiO_2: comparison of W and Mo, **153**, 349
ZnS molecular beam epitaxy on Si substrates, **151**, 207

Silver
breakdown conduction in C thin film devices with Ag film contacts on glass substrates, **152**, 473
electroforming of a C thin film device with an Ag film, **152**, 481
electron microscope observations and measurements in the Al/Ag thin film system, **146**, 83
measurement of preferred orientations in the Ag–silica interface, **151**, 65
optical properties of $AgGaSe_2$ thin films, **148**, 143
photoinduced effect on phase transition in Ag_3VO_4 thin films, **149**, L85
photosensitive properties of organometallic films of silver anthraquinone derivatives, **150**, 175
temperature dependence of electrical conduction in discontinuous Ag films on sapphire substrates, **148**, 233

Size quantization
bistable reflection and plane transverse magnetic wave passage in a dimensionally quantized film, **147**, 103

Solar cells
kinetics of the dry formation of Cu_2S in Cu_2S–CdS solar cells, **151**, 133
roll-to-roll preparation of an a-Si:H solar cell on a polymer film substrate, **146**, 75

Solid state reactions
SnSe thin films synthesized by solid state reactions, **149**, 197

Solution growth
solution growth technique for the deposition of cobalt selenide thin film, **149**, L81

Spalling
spalling resistance of cemented carbide with physically and chemically vapour-deposited coatings, **154**, 417

Spin wave resonance
study of the Kirkendall effect in magnetic bilayers by spin wave resonance method, **146**, L37

Spinels
behaviour of plasma-sprayed spinel-coated steel substrates in chloride melt at 710 °C, **150**, 253

Spray pyrolysis
nucleation and growth characteristics of spray-pyrolysed CdS thin films, **147**, 203

Spraying
decoration of alkali halide crystals with In_2O_3 and SnO_2 by spraying technique, **146**, L23

Sputtering
characterization of r.f.-sputtered zirconia coatings, **153**, 233
characterization of titanium silicide films formed by composite sputtering and rapid thermal annealing, **151**, 51
compressive stress of thin cubic BN films prepared by r.f. reactive sputtering on r.f.-biased substrates, **149**, L77
control of the deposition temperature by the use of a magnetic field in r.f. sputtering, **151**, 397
development of increasing surface roughness during ion sputtering, **151**, 433
effect of r.f. sputtering parameters on ZnO films deposited onto GaAs substrates, **150**, 283
effect of the deposition rate on the properties of d.c. magnetron-sputtered niobium nitride thin films, **152**, 535
effects of processing parameters on the microstructure and properties of sputter-deposited TiW thin film diffusion barriers, **153**, 313
effects of substrate temperature on Cu distribution, resistivity and microstructure in magnetron-sputtered Al–Cu films, **153**, 409
hard Mo coatings prepared by cathodic magnetron sputtering, **153**, 281
intrinsic stress in AlN prepared by dual-ion-beam sputtering, **154**, 159
ion beam sputtering of ZnS thin films, **151**, 27
measurement of the distribution of Ar in sputter-deposited very-large-scale integration metallization, **153**, 401
microstructure and physical properties of polycrystalline metastable $Ti_{0.5}Al_{0.5}N$ alloys

grown by d.c. magnetron sputter deposition, **153**, 55
microstructure of In_2O_3:Sn films produced by the d.c. sputtering technique, **148**, 279
observations on operation of planar magnetron sputtering system by target erosion patterns, **151**, 373
planarization of Al alloy film during high rate sputtering, **153**, 369
preparation of cubic boron nitride films by reactive diode sputtering, **151**, 243
properties of r.f. planar magnetron-sputtered Corning 7059 glass films, **146**, 191
reactive and non-reactive high rate sputter deposition of tungsten carbide, **151**, 383
relationship between substrate bias and microstructure in magnetron-sputtered Al–Cu films, **154**, 81
solid solution hardening in high rate reactively sputtered (Hf, Ti)N coatings, **153**, 159
sputtering of Mo–Si layers from composite targets, **149**, 211
structure of sputtered Ni_2P films, **149**, 303
temperature hysteresis during reactive r.f. sputtering, **150**, 59
voltaic cells of $(Zn_xCu_y)O_z$ thin films deposited by r.f. sputtering, **152**, 443

Stability
stability of plasma-deposited SiO_2 films evaluated using stress and IR measurements, **149**, 85

Stearates
deposition of Langmuir–Blodgett films of ferric stearate, **146**, L15

Stearic acid
effect of laser irradiation on evaporated stearic acid, **146**, 109

Steel
comment on "Spectrally selective surfaces on stainless steel produced by chemical conversion", **151**, L125
effect of substrate steel on the chemical vapour deposition of TiC onto tool steels, **149**, 95
growth of selective coatings on stainless steel, **151**, 413

Steels
behaviour of plasma-sprayed spinel-coated steel substrates in chloride melt at 710 °C, **150**, 253
influence of the TiN deposition temperature on the critical load and hardness of hardened steels, **154**, 425
spectrally selective surfaces on stainless steel produced by chemical conversion, **147**, 243
surface and interface characterization of heat-treated (Ti, Al)N coatings on high speed steel substrates, **153**, 45
three-dimensional secondary ion mass spectrometry analysis of surface-modified materials and the application to ^{13}C-implanted steels, **153**, 197
TiN coatings on M2 steel produced by plasma-assisted chemical vapour deposition, **154**, 377

Stoichiometry
Auger electron spectroscopic investigations of the influence of deposition parameters on the stoichiometry of n-CdSe films electrodeposited from low purity materials, **150**, 51
stoichiometry in Ti–N barrier layers studied by X-ray emission spectroscopy, **153**, 303

Stopping power
stopping power measurements for mega-electronvolt $^4He^+$ ions via thin films of metals and binary metal alloys, **149**, 219

Stress
compressive stress of thin cubic BN films prepared by r.f. reactive sputtering on r.f.-biased substrates, **149**, L77
interrelationship between internal stress, processing parameters and microstructure of physically vapour-deposited and thermally sprayed coatings, **154**, 125
intrinsic stress in AlN prepared by dual-ion-beam sputtering, **154**, 159
intrinsic stress in diamond-like C films and its dependence on deposition parameters, **146**, 27
mechanical properties of thin films: measurements of ultramicroindentation hardness, Young's modulus and internal stress, **154**, 171
stability of plasma-deposited SiO_2 films evaluated using stress and IR measurements, **149**, 85
stress rupture and creep behaviour of a low pressure plasma-sprayed NiCoCrAlY coating alloy in air and vacuum, **147**, 143
structure, internal stresses, adhesion and wear resistance of sputtered alumina coatings, **153**, 123
tempering effects in ion-plated TiN films: texture, residual stress, adhesion and colour, **146**, 165

Strontium
molecular beam epitaxy of InAs/$Sr_{1-x}Ba_xF_2$/InAs structures, **149**, 205

Structure
adhesion and structure of TiN arc coatings, **153**, 135
columnar structure and texture of Fe prepared at various evaporation rates, **147**, 299
crystal structure of the epitaxially grown SnO_2 thin films, **147**, 313

influence of substrate temperature and film thickness on the structure of reactively evaporated In_2O_3 films, **151**, 355
magnetic properties and microstructure of sputtered Co–Cr films, **147**, 231
morphology and structure of chemically vapour-deposited Ti(C, N) coatings, **146**, 45
new model for electron movement in a thick film resistor and its application to analysis of the structure and conduction mechanism in these resistors, **152**, 487
optical properties and structure of thin SiO_x films, **151**, 317
structural transformation induced by N implantation in thin metal films, **147**, 49
structure and composition of Te/CdS thin film diodes, **149**, 325
structure and optical properties of WO_3 thin films prepared by chemical vapour deposition, **147**, 131
structure and optical properties of a-C–Sn:H alloys prepared using the sputter-assisted plasma chemical deposition technique, **150**, 189
structure and physical properties of plasma-grown a-C:H films, **146**, 93
structure, internal stresses, adhesion and wear resistance of sputtered alumina coatings, **153**, 123
structure–mechanical property relationship of a-SiO thin films, **154**, 149

Sublimation
sublimation of cleaved surfaces of Zn and galena single crystals
I: experimental, **147**, 57

Substrate
aluminized polyester films: influence of substrate on metal texture, **149**, 105
influence of the substrate on the crystallization kinetics of vapour-deposited a-Se films, **149**, L73
metal–insulator phase transition in VO_2: influence of film thickness and substrate, **150**, 11
thermal and thermal deflection analyses in substrates during coating deposition, **150**, 259

Substrate bias
effects of substrate bias on the resistivity and microstructure of Mo and molybdenum silicide films, **153**, 359

Substrate temperature
effects of substrate temperature on Cu distribution, resistivity and microstructure in magnetron-sputtered Al–Cu films, **153**, 409
influence of substrate temperature and film thickness on the structure of reactively evaporated In_2O_3 films, **151**, 355
influence of the substrate temperature on the properties of $MoSi_2$ thin films, **149**, 61
statistical study of the combined effects of substrate temperature, bias, annealing and a Cr_3Si_2 undercoating on the tribological properties of r.f.-sputtered MoS_2 coatings, **154**, 323

Sulphur
fundamental aspects of the electronic structure, materials properties and lubrication performance of sputtered MoS_2 films, **154**, 309
growth and optical characterization of spin-coated As_2S_3 multilayer thin films, **147**, 275
ion beam sputtering of ZnS thin films, **151**, 27
kinetics of the dry formation of Cu_2S in Cu_2S/CdS solar cells, **151**, 133
measurement of optical losses and damage resistance of ZnS–Na_3AlF_6 and TiO_2–SiO_2 laser mirrors depending on coating design, **152**, 433
nucleation and growth characteristics of spray-pyrolysed CdS thin films, **147**, 203
plasma-assisted sulphuration of InP, **149**, 313
preparation and characterization of chemically deposited tin(II) sulphide thin films, **150**, 269
rhombohedral distortion of EuS epitaxial films on Si(111) substrates, **151**, 191
statistical study of the combined effects of substrate temperature, bias, annealing and a Cr_3Si_2 undercoating on the tribological properties of r.f.-sputtered MoS_2 coatings, **154**, 323
structure and composition of Te/CdS thin film diodes, **149**, 325
sublimation of cleaved surfaces of Zn and galena single crystals
I: experimental, **147**, 57
trap diagnostic of thin CdS films, **146**, 139
utilization of the diagram of condensed phases for the system In–P–S for analysis of the composition of native sulphide films formed on InP, **150**, 347
ZnS molecular beam epitaxy on Si substrates, **151**, 207

Superconductors
chemical vapour deposition of superconducting Nb_3Ge controlled by diffusion in the gas phase, **150**, 311
plasma-sprayed high T_c superconductor coating, **152**, L143

Surface reactions
phase-controlled surface reactions, **152**, 327

Surface sites
role of preferred surface sites in the nucleation and growth of Au on NaCl

II: reanalysis of two comprehensive studies, **149**, 363
Surfaces
factor analysis in surface spectroscopies, **154**, 11
near-IR surface impedance of thin metallic films with unlike surfaces, **152**, 411
phase transitions in adsorbed layers
VII: a model for mixed gas adsorption on solid surfaces, **147**, 333
sublimation of cleaved surfaces of Zn and galena single crystals
I: experimental, **147**, 57
surface and interface characterization of heat-treated (Ti, Al)N coatings on high speed steel substrates, **153**, 45
surface topography of pyrolytic C and of Au thin films by scanning tunnelling microscopy: grain boundaries and surface defects, **154**, 65
Synchrotron radiation
analysis of Co-doped iron dioxide thin films by synchrotron radiation, **154**, 439

T

Tellurium
anomalous photovoltaic effect in vacuum-deposited CdTe films, **150**, 217
current–voltage spectra of metal/oxide/SnTe diodes
II: analysis, **149**, 149
$Cu_xLi_{1-x}InTe_2$ epitaxial layers on $A^{III}B^{V}$ substrates and the influence of lattice misfit, **151**, 35
drift mobility in a-$Se_{1-x}Te_x$/Se double-layer xerographic photoreceptors, **148**, 251
effect of Cl on electrophotographic properties of Se–Te alloy, **149**, 9
effect of electrodes and high fields on the electrical conductivity of evaporated Ge and Te thin films, **146**, L27
effect of the nature of the counterelectrode on the current–voltage characteristics of thin film $Al/Al_2O_3/Te$ structures, **148**, 261
effect of ultrathin Se overcoat on the stability of Te-based optical recording media, **154**, 447
electric field dependence of conductivity in thin amorphous films and bulk glasses in the system $Ge_4Se_{6-x}Te_x$, **150**, 135
formation and properties of vacuum-evaporated high conductivity n-type CdTe films, **147**, 75
grain boundary interdiffusion in Cd/Te thin film couples, **148**, 163
growth of epitaxial $Cd_{1-x}Mn_xTe$ films by hot-wall evaporation, **150**, 337
influence of preparation technique on the conductivity of thin amorphous $Ge_4Se_{6-x}Te_x$ films, **150**, 125
mechanisms of temperature quenching of luminescence due to deep centres in $CdSe_xTe_{1-x}$ $(0<x<1)$ alloys, **146**, 233
optical transitions in CdTe thin films produced by hot-wall vacuum evaporation, **147**, 9
photoconduction on photo-oxidized Te thin films, **148**, 29
structure and composition of Te/CdS thin film diodes, **149**, 325
Temperature
temperature effects in thin metal films, **148**, 343
temperature-dependent resistivity measurements on polycrystalline SiO_2-covered thin Ni films, **150**, 209
temperature-dependent resistivity measurements on polycrystalline SiO_2-covered thin Au films, **150**, 201
Temperature coefficient of resistivity
resistivity, temperature coefficient of resistivity and thermoelectric power of thin continuous metal films
I: a survey and critical appraisal of the application of processing methods to experimental data, **150**, 145
II: a methodology for computer processing of thin film data to extract parameters with associated error estimates, **150**, 163
Temperature hysteresis
temperature hysteresis during reactive r.f. sputtering, **150**, 59
Tempering
tempering effects in ion-plated TiN films: texture, residual stress, adhesion and colour, **146**, 165
Tensimetry
tensimetric investigation of silicon nitride films, **147**, 267
Texture
aluminized polyester films: influence of substrate on metal texture, **149**, 105
columnar structure and texture of Fe prepared at various evaporation rates, **147**, 299
tempering effects in ion-plated TiN films: texture, residual stress, adhesion and colour, **146**, 165
Theoretical methods
theoretical analysis of the Einstein relation in ultrathin films of degenerate ternary chalcopyrite semiconductors, **148**, 219
Thermal deflection
thermal and thermal deflection analyses in substrates during coating deposition, **150**, 259
Thermal effects

optimization of thermal performance of Langmuir–Blodgett film pyroelectric devices, **146**, 7
thermally induced phenomena in $Ga_{1-x}Al_xAs$ optical filters, **146**, L41
Thermodynamics
physicochemical analysis of InAs gas phase epitaxy in the InAs–$AsCl_3$–H_2 system
I: thermodynamic considerations, **147**, 33
Thermoelectric power
analysis of the dose dependence of the thermoelectric power of ion-bombarded Bi/Sb thin films, **152**, 449
resitivity, temperature coefficient of resistivity and thermoelectric power of thin continuous metal films:
I: a survey and critical appraisal of the application of processing methods to experimental data, **150**, 145
II: a methodology for computer processing of thin film data to extract parameters with associated error estimates, **150**, 163
Thickness
comparison of thickness-measuring methods, **154**, 291
influence of the individual layer thickness on the depth resolution determined sputter depth profiling of multilayers, **146**, L11
Thin films
calculation of the profile of thin films deposited by evaporation under vacuum from cylindrical creusets, **150**, 369
mechanical properties of thin films: a review, **154**, 109
quantification of physical properties of thin films, **154**, 21
stopping power measurements for mega-electronvolt $^4He^+$ ions via thin films of metals and binary metal alloys, **149**, 219
thin film characterization using a mechanical properties microprobe, **153**, 185
transmission electron microscopy for the determination of the microstructure of thin films and interfaces, **154**, 43
Tin
crystal structure of the epitaxially grown SnO_2 thin films, **147**, 313
current–voltage spectra of metal/oxide/SnTe diodes
II: analysis, **149**, 149
decoration of alkali halide crystals with In_2O_3 and SnO_2 by spraying technique, **146**, L23
formation of whiskers and hillocks on the surface of thin films of Cu/Sn, **150**, 357
kinetics of the formation of intermetallic compounds in thin films of Cu/Sn, **148**, 109
microstructure of In_2O_3:Sn films produced by the d.c. sputtering technique, **148**, 279
optical and electrochemical investigation of oxide films on electrodeposited Sn–Ni alloy coatings
I: determination of composition and mechanism of growth of oxide films, **150**, 115
photovoltaic junctions between In_2O_3:Sn and Si, **149**, 283
preparation and characterization of chemically deposited tin(II) sulphide thin films, **150**, 269
preparation, electrical properties and optical characterization of Cd_2SnO_4 and $CdIn_2O_4$ thin films as transparent and conductive coatings, **153**, 479
properties of electron-beam-evaporated tin oxide films, **147**, 321
properties of tin oxide films prepared by reactive electron beam evaporation, **149**, 291
semiconductor properties of amorphous C–Sn thin films, **146**, L19
SnSe thin films synthesized by solid state reactions, **149**, 197
structure and optical properties of a-C–Sn:H alloys prepared using the sputter-assisted plasma chemical deposition technique, **150**, 189
temperature dependence of transport properties in evaporated In_2O_3:Sn films, **148**, 7
thin transparent In_2O_3:Sn films as IR filters, **148**, L55
topography and microstructure of Cu–Sn coatings deposited by magnetron sputtering, **151**, 235
Titanium
acid corrosion behaviour of amorphous and crystalline $Ti_{75}Ni_{20}Si_5$ alloys, **149**, 171
adhesion and structure of TiN arc coatings, **153**, 135
Auger electron spectroscopy and Rutherford backscattering spectroscopy studies of TiN and TiC coatings prepared by the activated reactive evaporation process, **153**, 149
cathodic arc plasma deposition of TiC and TiC_xN_{1-x} films, **153**, 209
characteristics of Ti arc evaporation processes, **153**, 91
characterization of titanium silicide films formed by composite sputtering and rapid thermal annealing, **151**, 51
chemical analysis of TiN films: a round robin experiment, **153**, 169
chemical vapour deposition of doped TiO_2 thin films, **147**, 167

cross-sectional transmission electron microscopy characterization of the interface between plasma-sprayed TiC and Inconel, **154**, 91
effect of N content on the critical normal force in scratch testing of Ti–N films, **154**, 351
effect of substrate steel on the chemical vapour deposition of TiC onto tool steels, **149**, 95
effects of processing parameters on the microstructure and properties of sputter-deposited TiW thin film diffusion barriers, **153**, 313
electrochemical adjustment of thin film Ti–Pd resistors, **153**, 387
formation of titanium, chromium, niobium and zirconium aluminides in thin films for interconnections, **149**, 269
growth and properties of TiN and TiO_xN_y diffusion barriers in Si-on-sapphire integrated circuits, **153**, 287
influence of the TiN deposition temperature on the critical load and hardness of hardened steels, **154**, 425
ion mixing of the interfaces between TiNi films and glass substrates, **147**, 93
lattice vacancies in TiN and HfN films: a study by positron annihilation, **153**, 103
low temperature oxygen dissolution in titanium, **146**, 201
measurement of optical losses and damage resistance of $ZnS–Na_3AlF_6$ and $TiO_2–SiO_2$ laser mirrors depending on coating design, **152**, 433
microstructure and physical properties of polycrystalline metastable $Ti_{0.5}Al_{0.5}N$ alloys grown by d.c. magnetron sputter deposition, **153**, 55
morphology and structure of chemically vapour-deposited Ti(C, N) coatings, **146**, 45
plasma conditions for the deposition of TiN by biased activated reactive evaporation and dependence of the resistivity on preferred orientation, **153**, 115
preparation and characterization of titanium boride films, **153**, 329
properties and performance of chemically vapour-deposited TiC-coated ball-bearing components, **153**, 253
properties of physically vapour-deposited Ti–Al–V–N coatings, **153**, 83
reactive arc vapour ion deposition of TiN, ZrN and HfN, **153**, 75
solid solution hardening in high rate reactively sputtered (Hf, Ti)N coatings, **153**, 159
stoichiometry in Ti–N barrier layers studied by X-ray emission spectroscopy, **153**, 303
surface and interface characterization of heat-treated (Ti, Al)N coatings on high speed steel substrates, **153**, 45
surface hardness enhancement of Ti by an ion implantation technique, **146**, L33
tempering effects in ion-plated TiN films: texture, residual stress, adhesion and colour, **146**, 165
TiN coatings on M2 steel produced by plasma-assisted chemical vapour deposition, **154**, 377
$Ti_xAl_{1-x}N$ films deposited by ion plating with an arc evaporator, **153**, 67
X-ray analysis of strain in titanium nitride layers, **149**, 49
X-ray characterization of TiN_x films having the CaF_2-type structure, **150**, 277
Young's modulus of TiN, TiC, ZrN and HfN, **153**, 37

Topography
surface topography of pyrolytic C and of Au thin films by scanning tunnelling microscopy: grain boundaries and surface defects, **154**, 65
topography and microstructure of Cu–Sn coatings deposited by magnetron sputtering, **151**, 235

Transistors
A-heterojunction and dielectrically insulated gate InP field effect transistors, **153**, 497
comparative study of thin film transistors using rare earth oxides as gates, **147**, 25
thin film transistors with Er_2O_3 gate insulators, **148**, 203

Transmission electron microscopy
cross-sectional transmission electron microscopy characterization of the interface between plasma-sprayed TiC and Inconel, **154**, 91
future trends of cross-sectional transmission electron microscopy for electronic and photonic devices, **154**, 75
transmission electron microscopy for the determination of the microstructure of thin films and interfaces, **154**, 43

Transparent films
activated reactive evaporation of a transparent conductive coating for the IR region, **148**, 83
coating a transparent substrate by a transparent thin film for equal p and s reflectances at oblique incidence: all possible solutions, **147**, 17
thin transparent In_2O_3:Sn films as IR filters, **148**, L55

Transport
transport in refractory metals and their interaction with SiO_2: comparison of W and Mo, **153**, 349

transport of evaporated materials through support gas in conjunction with ion plating
I, **149**, 225
II, **149**, 237
Transport properties
temperature dependence of transport properties in evaporated In_2O_3:Sn films, **148**, 7
transport properties of thin amorphous films of cadmium arsenide, **151**, 87
Traps
influence of the spatially non-homogeneous trap distribution on the transient currents in insulating layers at high fields, **149**, 261
trap diagnostic of thin CdS films, **146**, 139
Tribological properties
statistical study of the combined effects of substrate temperature, bias, annealing and a Cr_3Si_2 undercoating on the tribological properties of r.f.-sputtered MoS_2 coatings, **154**, 323
Tubules
lipid-based tubule microstructures, **152**, 181
Tungsten
adhesion measurements of chemically vapour-deposited and physically vapour-deposited hard coatings on WC–Co substrates, **154**, 361
comparison of W film deposition techniques for very-large-scale integration technology, **153** 469
effects of processing parameters on the microstructure and properties of sputter-deposited TiW thin film diffusion barriers, **153**, 313
optical properties of tungsten bronze surfaces, **148**, L59
reactive and non-reactive high rate sputter deposition of tungsten carbide, **151**, 383
structure and optical properties of WO_3 thin films prepared by chemical vapour deposition, **147**, 131
transport in refractory metals and their interaction with SiO_2: comparison of W and Mo, **153**, 349
WN_x: properties and applications, **153**, 507
Tunnelling
degradation of metal/oxide/semiconductor structures by Fowler–Nordheim tunnelling injection, **148**, 149
Two-dimensionality
deviations from two-dimensionality in classical adsorbed films composed of linear molecules, **147**, 223

U

Ultrathin films
theoretical analysis of the Einstein relation in ultrathin films of degenerate ternary chalcopyrite semiconductors, **148**, 219
Underlays
role of In underlays in the prevention of thermal grooving in thin Au films, **149**, 29

V

Vacancies
lattice vacancies in TiN and HfN films: a study by positron annihilation, **153**, 103
Vanadium
electrical properties of thin V–Al alloy films, **151**, 297
high optical contrast in VO_2 thin films due to improved stoichiometry, **147**, 111
metal–insulator phase transition in VO_2: influence of film thickness and substrate, **150**, 11
photoinduced effect on phase transition in Ag_3VO_4 thin films, **149**, L85
properties of physically vapour-deposited Ti–Al–V–N coatings, **153**, 83

W

Wear
mechanical properties of wear-resistant coatings
I: modelling of hardness behaviour, **148**, 41
II: experimental studies and interpretation of hardness, **148**, 51
structure, internal stresses, adhesion and wear resistance of sputtered alumina coatings, **153**, 123
wear resistance of metastable Ni–B alloys produced by chemical vapour deposition, **153**, 267
Whiskers
formation of whiskers and hillocks on the surface of thin films of Cu/Sn, **150**, 357

X

X-ray photoelectron spectroscopy
Auger electron spectroscopy, X-ray photoelectron spectroscopy, work function measurement and photoemission of adsorbed Xe on thin films of Pt–Re(111) alloys, **151**, 251
X-ray studies
characterization of epitaxial films by grazing-incidence X-ray diffraction, **154**, 33
characterization of Ni–Cr thin films by X-ray analysis, **148**, 209
characterization of thin Al_2O_3 films on InP substrates by X-ray topography, **148**, L67
in situ X-ray diffraction study of the effects of Ge and Ni concentrations on melting in Au-based contacts to GaAs, **147**, 177
instrument-invariant method of film thickness

determination by means of substrate-to-film X-ray peak intensity ratioing, **148**, 67
low temperature NH_3 adsorption on clean amorphous and crystalline Si surfaces and N bonding in a-Si_3N_4:H: a comparative X-ray photoelectron spectroscopy study, **149**, 385
stoichiometry in Ti–N barrier layers studied by X-ray emission spectroscopy, **153**, 303
X-ray analysis of strain in titanium nitride layers, **149**, 49
X-ray characterization of TiN_x films having the CaF_2-type structure, **150**, 277
X-ray diffraction studies of Bi_2O_3 films prepared by reactive and activated reactive evaporation, **148**, 181
X-ray section topographs of a vapour-grown diamond film on a diamond substrate, **151**, 199

Y

Young's modulus
mechanical properties of thin films: measurements of ultramicroindentation hardness, Young's modulus and internal stress, **154**, 171
Young's modulus of TiN, TiC, ZrN and HfN, **153**, 37
Yttrium
stress rupture and creep behaviour of a low pressure plasma-sprayed NiCoCrAlY coating alloy in air and vacuum, **147**, 143

Z

Zinc
chemical deposition of ZnO film, **149**, 65
effect of r.f. sputtering parameters on ZnO films deposited onto GaAs substrates, **150**, 283
ion beam sputtering of ZnS thin films, **151**, 27
measurement of optical losses and damage resistance of ZnS–Na_3AlF_6 and TiO_2–SiO_2 laser mirrors depending on coating design, **152**, 433
physical properties of ZnO sputtered films, **150**, 291
study of the gap states in vacuum-deposited Zn_3P_2 Schottky barriers using admittance spectroscopy, **149**, 1
sublimation of cleaved surfaces of Zn and galena single crystals
I: experimental, **147**, 57
voltaic cells of $(Zn_xCu_y)O_z$ thin films deposited by r.f. sputtering, **152**, 443
Zirconium
characterization of r.f.-sputtered zirconia coatings, **153**, 233
electromechanical properties and characterization of zirconia–alumina and alumina coatings, **154**, 143
formation of titanium, chromium, niobium and zirconium aluminides in thin films for interconnections, **149**, 269
metastable phases in vapour-deposited Al–Zr thin films, **146**, 273
reactive arc vapour ion deposition of TiN, ZrN and HfN, **153**, 75
Young's modulus of TiN, TiC, ZrN and HfN, **153**, 37
ZnS molecular beam epitaxy on Si substrates, **151**, 207
